ACCESSORY

Tent
*1

Storage bag
*1

Tent peg
*14

Wind rope
*6

Pressure
limiting pump
*1

Canopy
*1

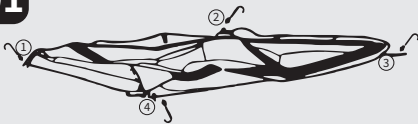

Tent pole
*2

ATTENTION

- Please check the manual carefully and make sure you have received all the parts.
- If there is any missing, please let us know the letter of the parts you need.
- If there is any damage, please send clear photos to us, and we will check and offer you the best solution soon.

INSTALLATION STEPS

01

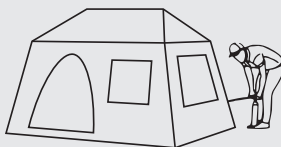

Unfold the tent and fix the 4 positions on the ground with tent pegs.

02

Connect the air pump to the tent inlet.

03

Pump for 3-5 minutes until the tent is fully open and the column is firm.

04

Put nails well, pull away the wind rope then secure it. The canopy and tent are linked by zippers.

STORAGE INSTRUCTIONS

- Store in a completely dry place to prevent damage from mold. The tent can be damaged if stored in a damp condition.
- If you pack the tent after it has been rained on or when the dew has condensed in the morning, please set it up immediately after returning home to allow it to fully dry before long-term storage.
- Extra caution must be taken in high-humidity climate conditions to prevent mold damage. Mildew can be cleaned with a diluted solution of white vinegar (5 parts water to 1 part white vinegar).

CARE INSTRUCTIONS

- Clean before storage (including tent poles). Before storing, clean off any dirt and other natural debris. Keep tent poles, stakes, and other accessories clean as well.
- The best way to clean the tent is to use water and a soft brush, then allow it to air dry.
- We strongly recommend using a separate ground cloth to prolong the lifespan of the tent floor and help maintain cleanliness.
Keep the zippers clean and occasionally use zipper lubricant.
