

ASSEMBLY INSTRUCTIONS

Medicine Cabinets

We would like to thank you for including this medicine cabinet in your bath remodeling project. This cabinet will give you many years of trouble free service and add a special touch of elegance to your homes decor.

Please read these instructions carefully before you start installation of your new cabinet.

Medicine Cabinet Back View

Parts List

A - Predrilled Hole

B - Predrilled Hole

C - Wood Screw

D - Plastic Anchor

Installation Instructions

Mounting: _____

- A. Measure the distance between the centers of the pilot holes located on the back of your cabinet. Mark corresponding spots on the wall at this distance and height you wish to mount your cabinet. Or with the help of an assistant locate the position you wish for your cabinet, then use a level to make sure the cabinet is level. Use a pencil and mark the wall through the pilot holes on the back of the cabinet.
- B. With your mounting spots located and marked, drill a 3/16 inch diameter pilot hole at each spot.
- C. With the pilot holes completed, carefully tap one of the plastic anchors (D) provided with your cabinet into each of the holes.

Figure 1

- D. Proceed to screw one of the 1-1/2 inch wood screw (C) provided with your cabinet through each pilot holes in the cabinet back and into the plastic anchors making sure the screws are flush to the back of the cabinet. Make sure that the cabinet is secured tightly.

Your installation is now complete.
