# How to assemble ?

Step1: Unfold the lamp body frame and lock it tight with M4 screw nut + M4 wrench.

Step2: Fix the safety cover ring to the lamp holder bracket by rotating it into the clips, then turn this whole finished piece up side down and lock the bracket tight at the clips'and central point by M10 wrench and M10 anti-backout nut caps.

Step3: Install the blade, and rotate to fasten the blade cap anticlockwise.

Step4: Put the paper tube under the fan blades, pass the wire through the hole on the motor housing, and fix the lamp arms onto it tight by M10 wrench and M10 anti-backout screw nuts, and adjust the lamp holders to the same level as the blades.

Step5: Hang the lamp housing module pieces onto the unfolded bracket, then close the 'wrench' shaped connectors and tighten them with M4 screw nuts.

Step6: Fix the hanging bracket to the ceiling, connect the power cable, install the light bulbs, and fasten the canopy to the bracket tight by M4 screws and M4 wrench.

# How to Install to the ceiling ?

1. Thread the power cable to the hole of the hanging bracket.
2. Fix the bracket to the ceiling by wood or expansion screws.
3. Connect the live wire and the neutral wire of the lamp body to the power cable separately.
4. Fix the the canopy to the bracket by fastening the screws on the sides

Connect the black wire to the live wire (L).  
Connect the white wire to the neutral wire (N).
