V1.0

How to Connect?

Step1: Connect the control box with LED light strip.

Step2: Connect the control box with power supply.

Step3: Plug in the power supply.

Or

***Tips of connect the waterproof DC head.**

1. Please note that the groove needs to be inserted correctly during connection.
2. Screw the nut firmly to ensure the best waterproof.

Three types of installation

1. Wipe the surface of the wall to ensure it is dry and clean. Peel off the adhesive film on the tape, stick the strip on the installing location. Press down on the strip light repeatedly to ensure it is firmly attached.

2. Use the cable zip ties to fix the strip light.

3. Use the stabilizing clip to fix the strip light.

5. Press the button on the controller.

Recommended Tip

Try to bend with a bigger radian to protect the strip light and electronic components on it.

Specifications

Pairing Instructions

1. Download the APP and install on your phone.
2. Turn on the Bluetooth on your phone.
3. Open the APP, tap the "+" icon in the top right corner and search new device.
4. APP will show the device found, just add it.
5. Tap the device icon to enter control panel.

ATTENTION

- » Use the product with the provided power adapter and control box only.
- » Do power on test before installation.
- » Do NOT allow children to install the strip light alone.
- » Please do NOT connect more strip to the product which will cause the power adapter overload.
- » If the power supply is damaged, please do not repair it yourself, please let professional technicians handle it.
- » When the light strip is rolled, please do not light it for more than 5 seconds.
- » Please turn off the power and unplug the adapter when the strip light will not be used for a long time.
- » Keep the product away from sharp objects or strong corrosive chemicals.
- » Do not use chemical reagents during daily maintenance to avoid damage to the light strip.
- » Please contact us if you have any problem or get a defective product. We will reply within 24 hours.

Troubleshooting

- a) APP can not find the device.
 - Make sure the phone bluetooth is on.
 - Allow the permissions of APP. APP needs them to connect the device.
 - Check the strip light is on. Or use remote control to check light is working.
 - Close APP, turn off bluetooth and turn on bluetooth again, then start APP to add device again. Ensure the phone is within 1m/3.28ft of the product without obstructions when connecting. Your phone may be incompatible with the APP. Try another phone.
- b) All lights don't work.
 - Check power is on.
 - Press ON and press "brightness up" multi times on remote.
 - Connect APP and turn on light and turn up brightness.
 - Reinstall all parts.
- c) Some light beads keep off or fail working.
 - Contact our support team.
