

TITANIUM Reinforced®

ADVANCED GLASS TREATMENT

Permanent anti-abrasion treatment on the glass' stems

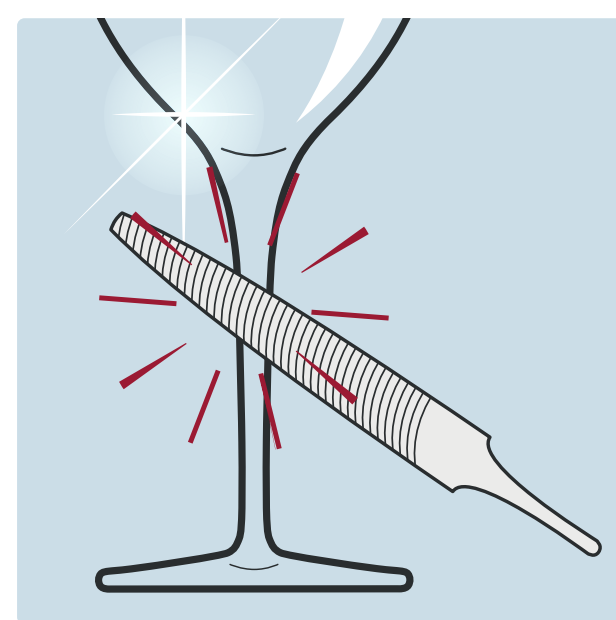

Patented process (nr EP20100153150) applied directly on the glass' stems using nanotechnology. First in the world.

ENHANCED HARDNESS

Highly reinforced stems

RESISTANCE TO ABRASION

Markedly increased

RESISTANCE TO BREAKAGES

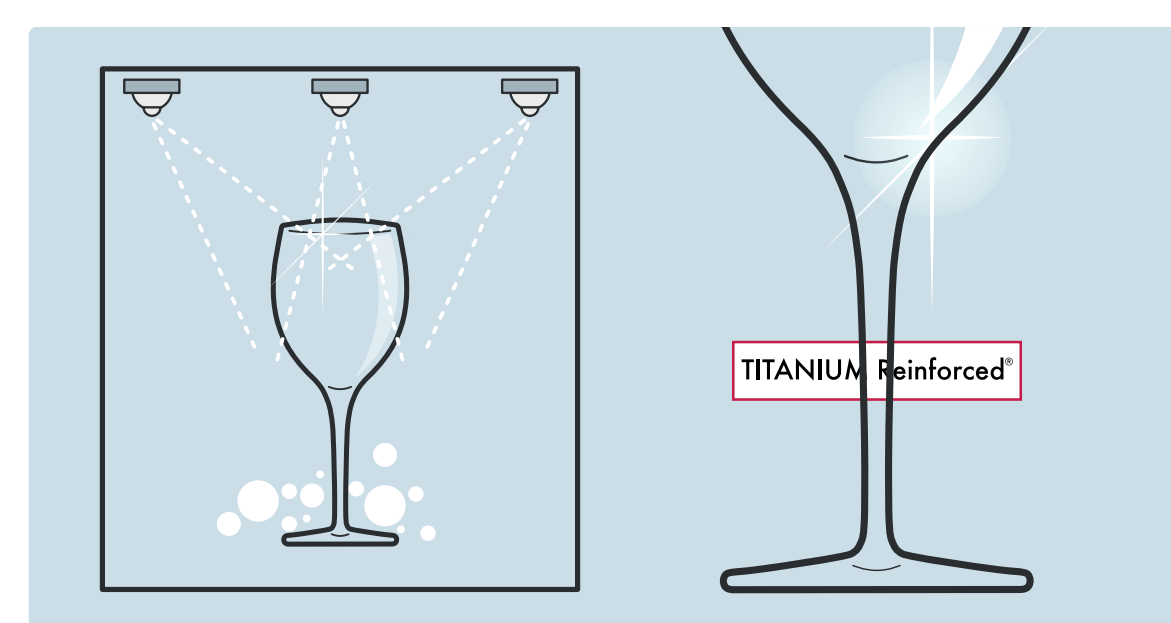

Permanently increased by 140%

NO GLASS DISCOLORATION

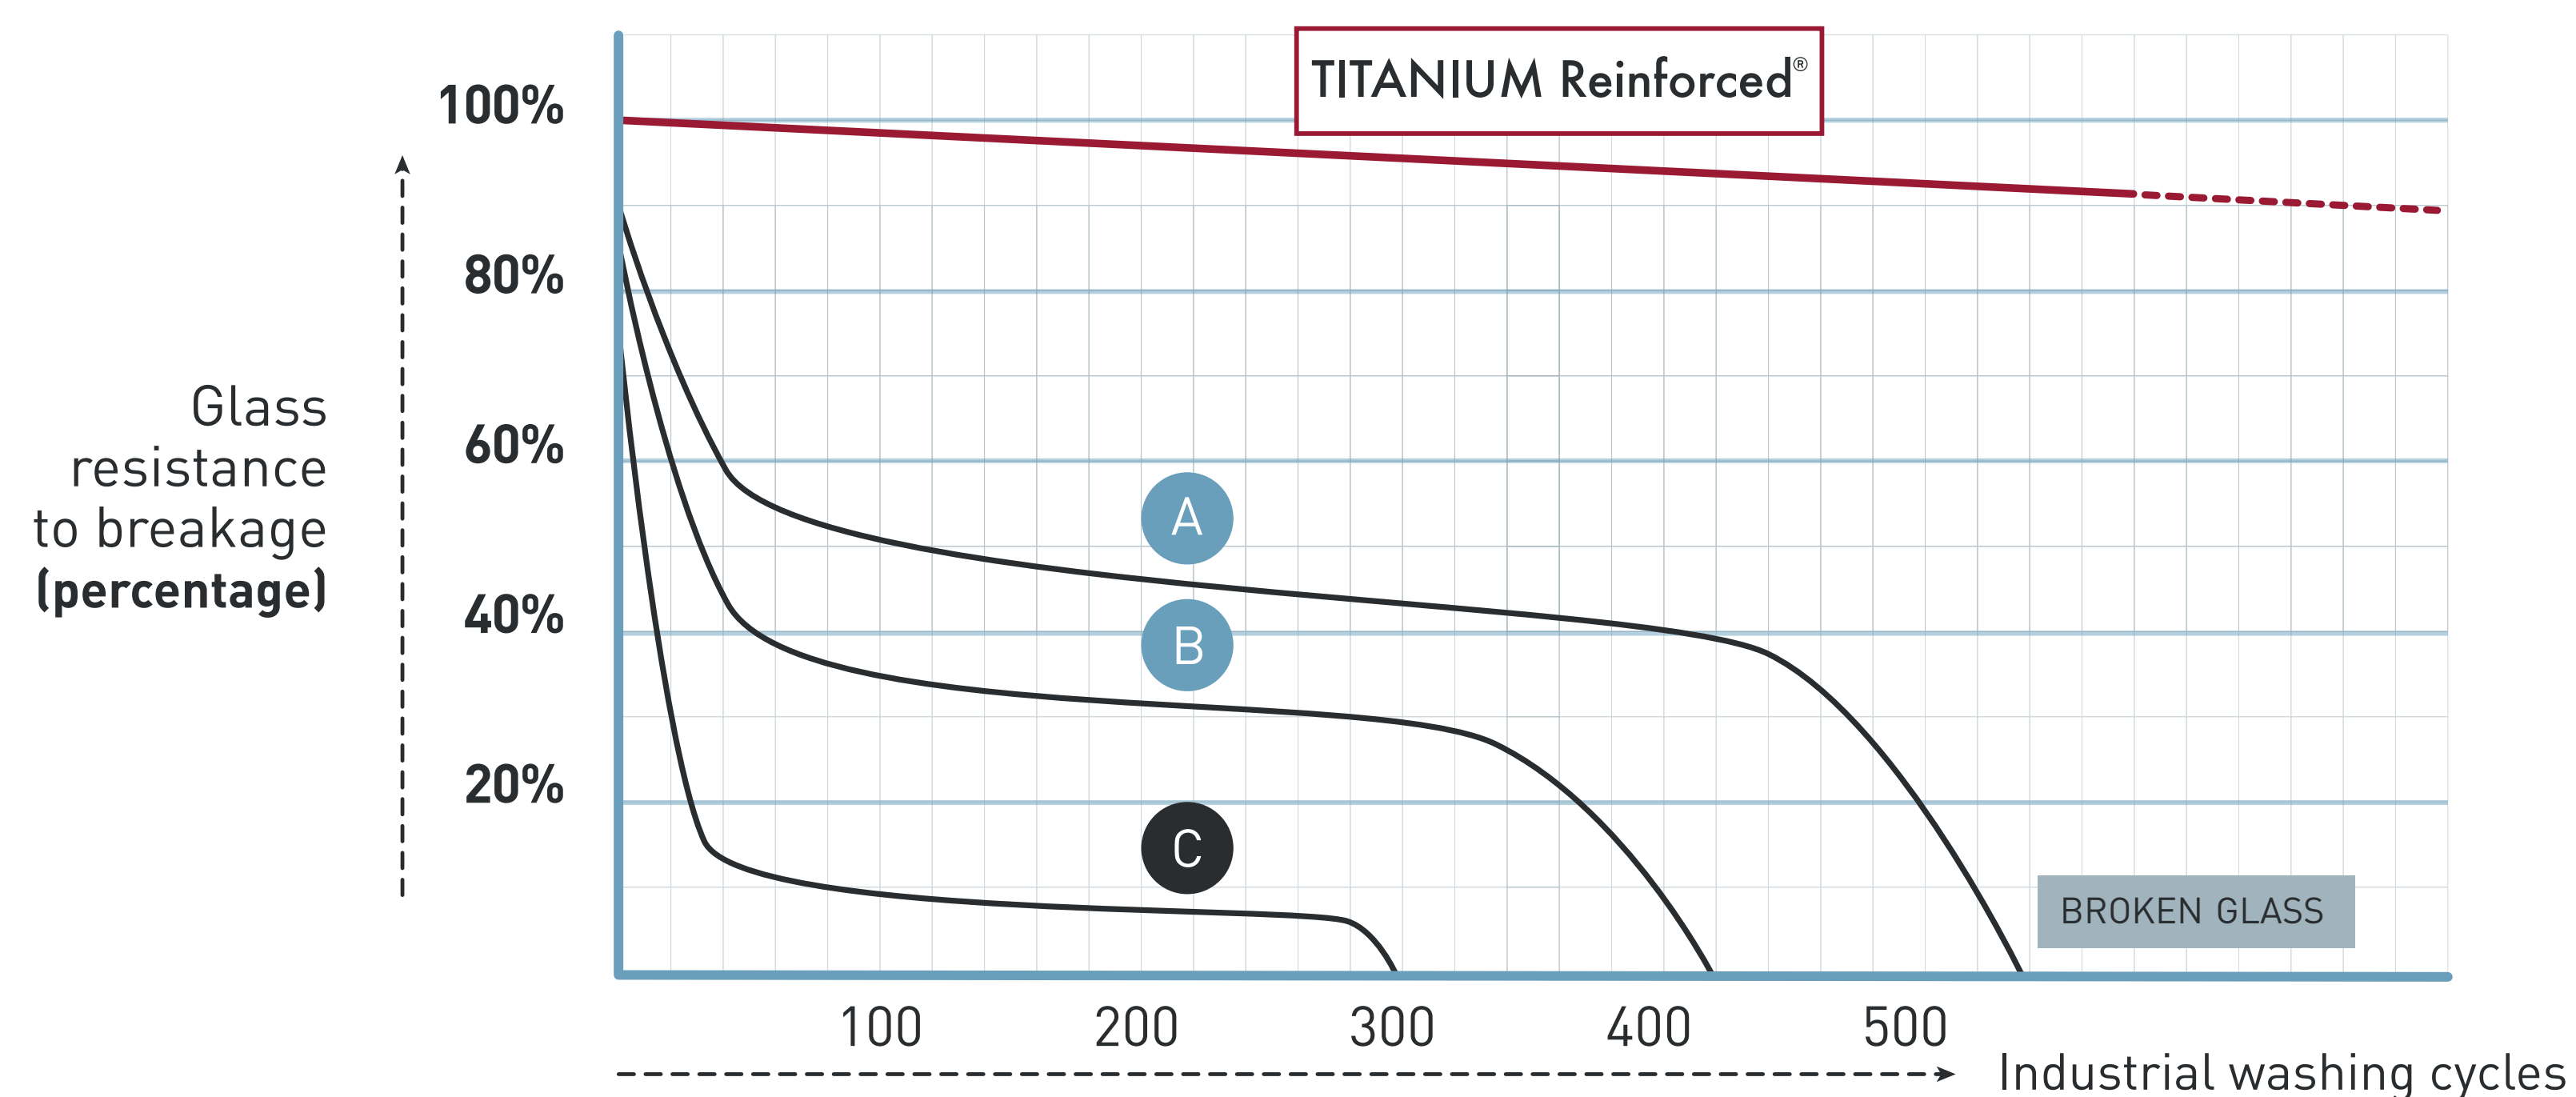

PERMANENT TREATMENT

Treatment guaranteed all washing cycles

TITANIUM REINFORCED® STEM BREAKAGE RESISTANCE VS COMPETITORS A, B, C

Internal Laboratory tests at different washing cycles

Competitor A & B: Stem with treatment different from Titanium Reinforced.

Competitor C: No stem treatment.

The graph shows how Luigi Bormioli's **TITANIUM Reinforced®** is a permanent, long lasting treatment that guarantees high stems' resistance even after 1000 washing cycles. Competitors' stems, even when treated, show decreased resistance to breakage after few washing cycles.
