# INSTALLATION INSTRUCTION

(D910CM)

## Chandelier Installation and Safety Standards

The installation of a chandelier is acrucial step in ensuring its safety. Chandelier safety standards dictate the process of installation,including the tools and equipment that canbe used,the methods of securing the chandelier,and the location of the chandelier.

Securing the chandelieris acrucial step in the installation process.Chandelier safety standards dictate that the chandelier must be securely attached toasuitable support,such as aceiling joist,to prevent it from falling. This includes ensuring that the support is strong enough to bearthe weight of the chandelier,and that the chandelier is properly balanced to prevent it from tipping or swaying.

Further more,the chandelier must be secured using suitable hardware,such as screws or bolts, that are strong enough to bear its weight. The hardware must be properly installed and tightened to ensure that the chandelier is securely attached.Regular inspections of the hardware are also necessary to detect and repair any damage or wear promptly.
