## Beach Pebble Lite Stones Set - 15 Stone Set

Everyone loves a stroll on the beach, especially when you find colorful shells and pebbles in the sand! Now your customers can enjoy finding colorful pebbles in their own living room with our beach pebble lite stones! A delightful combination of different lite stone types from our catalog, when set alight, our beach pebble lite stones are sure to liven up any gathering.

Our lite stones boast an old world charm. They have a stylish, yet minimalist design and create a neat and uncluttered look when used in a fire feature. Our beach pebble lite stones derive their color from an environmentally friendly ceramic stain that gets absorbed into porous material. Extremely durable, our lite stones are guaranteed not to crack or burst when exposed to high temperatures and will not lose their color either. Furthermore, they will not release any harmful chemicals so they are perfectly safe!

Our beach pebble lite stones may be used alone, or may also be used with ceramic stones or fire glass of other colors for a completely unique look.

Each set of beach pebble lite stones also includes 2 lbs of small lava rocks.
