

Recliner Assembly Instruction

To ensure the easiest of assembly, follow all steps in order. Two people required to assemble this item.

Make sure the recliner is opened in the designated area that it will be used in. When opening do not have any sharp objects on the floor and double check all items are there. There will be two ear pieces stored in the area between the metal brackets. When placing the back cushions, push down from the top until you hear a click sound from each outside. Note: the left and right cushions will have metal brackets on the outside and none on inside. If the metal brackets do not align with the base, then it is not in the right place.

Align the metal plates on the ears and the recliner and slide them in from the top.
