Step 29

Put 4 pieces of glass
into the cabinet in turn.

Tilt the glass and put it in.

M x4

Step 30

First, completely unscrew the screws on the parts

Then take out the black rubber pad from the inside of the part, and the white sponge remains unchanged inside the part.

7

Pay attention to the direction of the door hinge, rotate the screws to compress the black gasket, and do not place it in the opposite direction

Place the black gasket on the side where the screws are installed

-  x2
-  x2

Drill the hole with an electric drill
and punch in the colloidal particles

4x45mm

Fix the dressing
table to the wall

User's Guide

Thank you for purchasing this product. To use this product, please plug it into a 12V DC power supply. Please use if the product works normally after connecting to power.

Introduction

The box is an intelligent controller with 2 touch buttons. It can turn ON/OFF the light, change light colors, and adjust the light luminance.

Product Show

ATTENTION PLEASE

1. If there is no touch response suddenly, Re-plug the power to reset the touch static electricity.
2. If bubbles appear on the panel, remove the protective film.

Operation

This touch button is used to turn on/off, change colors, and adjust brightness.

A. Short touch -> lighting on -> short touch -> change light color -> short touch -> change light color -> short touch -> lighting off. B. Long touch -> adjust the luminance

This touch button is used to turn on/off the induction function.

- A. Short touch to turn on the induction function. It can auto-turn on the light when people are close to the controller in 1 meters. It can auto power off the light when the body is far away from the controller after 30 seconds.
- B. Long touch to turn off the induction function.
- C. Note: When you touch the light button to change the light modes, the induction function will automatically turn off. It is best to turn on this function after selecting the light color and adjusting the brightness you want.
