The fitting pack contains **SMALL ITEMS** which should be **KEPT AWAY FROM YOUNG CHILDREN**

IMPORTANT: Retain these instructions for future reference.

Care and Maintenance

How to care for your glass furniture

Use a glass cleaner or soapy water for cleaning. Do not use anything abrasive as this may damage the surface of the product.

How to care for your melamine furniture

The melamine coated surfaces of furniture do not usually need a great deal of cleaning. These sealed surfaces are easily cared for. Clean off slightly dirty surfaces with a moistened cloth or sponge. Dirtier surfaces can be cleaned with a little water and gentle cleaning agent or soap solution.

How to care for your metal furniture

Dust with a clean, soft dry cloth. Frequent dusting will remove abrasive build up, which can damage the finish over time. For stubborn stains, use a soft damp cloth and then revert back to the soft dry cloth. Spray polishes and solvents should not be used as they dissolve the protecting lacquer and allow oxidation of the genuine base material.

How to care for your upholstered furniture

The upholstery should not be exposed for long periods to direct sunlight as this may cause fading and deterioration of the cover material. Protect from exposure to sources of heat such as radiators or open flames.

It is recommended to give the upholstery a frequent vacuuming or light brushing.

It is very important to rub very gently to avoid colour change. This proper cleaning will prevent build-up of dust, soil and oils which can be damaging to the leather. In the event of a spillage it is imperative to act quickly. Carefully soak up any excess liquid, ideally using the edge of a white paper towel, then dab gently with a fresh towel taking care to avoid soaking in or spreading the remaining liquid.

How to care for your wood furniture

Dust with a clean, dry lint free cloth. Frequent dusting will remove abrasive build up, which can damage the finish over time. Spray polishes are best avoided as they contain silicones which may spoil the furniture's surface when building up over time.

Make sure all surfaces are protected from heat and liquids by mats and coasters. Wipe up spills immediately and ensure that a mat or pad is placed under paper if you are writing.

Our furniture will endure most temperatures in the home but it is best to avoid placing furniture next to heat sources such as radiators or fires. Be particularly careful with solid wood as the lack of humidity caused by home heating can cause damage such as warping.

WARNING

Never drag furniture when moving it. Always lift it.

Periodically check all fixings to ensure none have come loose. Re-tighten when necessary.

Please take care when handling or moving the furniture as careless handling may cause damage or injury.

Furniture can be dangerous if incorrectly assembled. Assembly should be carried out by a competent person.

No liability will be accepted for damage or injury caused by incorrectly installed or assembled furniture.

It is recommended to seek assistance when moving a heavy object. Take care when lifting to avoid personal injury and (or) damage to the product.

It is recommended that before moving a heavy object to a new location it is completely dis-assembled to avoid personal injury or damage to the furniture. Please be careful to retain all fittings when doing this.

PLEASE KEEP THESE INSTRUCTIONS FOR FUTURE REFERENCE
