

## Installation Guide

---

1. Start with a good map mark sunshade and then insert fixing posts.
2. Connect fixing accessories to mounting points
3. Ensure all connections face towards the middle of the shade and are tightly secured. Using fixing accessories, commence connecting the corners of the sunshade to the fixing points.

### Notice:

It is important to determine the most suitable fixing points. Some of these fixing points could already exist e.g. walls, wood posts, steel posts, pergola/sundeck, large tree, fence post or fascia. You should ensure all fixing points are structurally sound and if unsure, obtain independent advice from a builder or engineer.
