

Installation instructions for LED solar string light

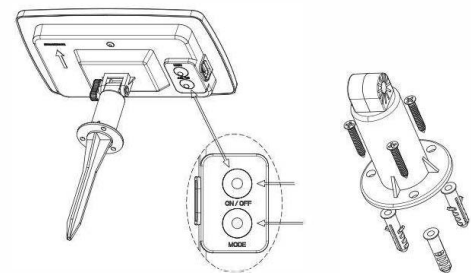

Note: Please read this user manual carefully before use and installation.

- 1.solar panel
- 2.control box
- 3.brace
- 4.ground spike
- 5.indicators
- 6.USB port
- 7.on/off switch
- 8.mode switch
- 9.led bulbs

INSTALLATION

- 1.Connect the ground spike and string lights with the control box.
- 2.Settle the string lights and secure the control box to where the solar panel can be shined by sunlight(on the ground with the spike or on the wall with the screws)
- 3.Press the on/off button and select the light mode.

ADVICE

- 1.Please re-charge the product before the first use via solar panel or a 5V USB charger. When it's fully charged the indicators on the left will turn green.(fig.1)
2. An USB charging port can be used to charge the product on rainy or cloudy days.(fig.2)
- 3.If necessary,the string can be extended by just connecting it with another one (remove the end cap first). (fig.3)
