

Assembly Instructions

V01.240728.01

Grantee:

DO NOT RETURN: Keep the regular item and get a Replacement and new products instead of Return.

REFUND: Any problems caused by us can be compensated by a refund.

We are very sorry if we have caused you any trouble.
Try to contact our service team at first time to solve your problem.
Thank you for giving our service team another chance.
Thank you for your patience and cooperation.

Before Start:

Check part List: Check the part list to make sure you have all parts before starting assembly

Cursory glance: A cursory glance through the manual can help speed up the installation process and reduce mistakes before starting

Follow Instructions: Follow instructions step by step to avoid Unnecessary mistakes, destruction and failure.

Recommended:

Two Person may help assemble work easier.

Phillips and hexagonal screwdriver.

Power tools can reduce installation time.

Note:

Tip: We provide anti tipping accessories for those in need. If you need them, please install them according to the instructions. If not needed, your product installation has been completed, please feel free to use it.

1.Put the cabinet against the wall and mark the hole locked against the wall with a marker and then drill holes at the marked locations.

1

2.Place anchors (Q) into the hole.

2

3.Push the shelf close to the wall, align it with the holes, and then tighten it with screws(J).

3

Step 33 / 34

Note:

Step 34 / 34

R  x18

Note:
Screw R needed to be installed from inside of the drawer to outside.

You may need patience to get a perfect smooth slide of drawer experience, and we appreciate your patience.
Asking for a second person to assist you will simplify the process.

1.Align Components: Position the groove on the drawer side to match the rail profile. Insert a precision tool (e.g., screwdriver tip) into the outermost hole of the slide rail. Ensure both sides are aligned symmetrically.

2.Slide Drawer Inward: Gently push the drawer into the cabinet until slide come up against drawer front. This step needs to be done simultaneously for both sides.

3.Secure & Adjust: While maintaining pressure on the tool, slowly pull the drawer outward until slide can not be moved.

4.Finalize Installation: Locate the pre-drilled mounting holes where the rails meet the drawer sides. Securely tighten all screws on both sides.
