Sconce	• MLLWS	Chrome	• CH	Heirloom Gold	• PLLWSHFG
		Brushed Nickel	• BN	Heirloom Silver	• PLLWSHFS
				Laurel Gold	• PLLWSLFG
				Laurel Silver	• PLLWSLFS
				Classic Gold	• PLLWSCFG
				Classic Silver	• PLLWSCFS
				Bead Mahogany	• PLLWSBFM
				Bead White	• PLLWSBFW

Note:
If using the optional matching
Sconce Frame, See page 2 for
instructions.

Installation

1. Attach crossbar A to the electrical box using the screws supplied with the box. Sometimes it is necessary to mount the crossbar at a slight upward angle (use a washer or two under the lower screw) so that the weight of the fixture doesn't make it appear to "droop".
2. Loosen the set screw B on canopy C and carefully slip the canopy toward the elbow or body of the fixture so it is out of your way. Set the larger part of the two part canopy E between the smaller section C and the wall.
3. Screw locknut D about 1/2" down the threaded pipe.
4. Slip the wires through the crossbar and turn fixture clockwise, screwing it securely to the crossbar. Be careful not to twist the wires coming from the threaded pipe.
5. After squaring the fixture to the room, tighten the locknut securely against the cross bar. This prevents any movement when changing bulbs or if the fixture is bumped.
6. Connect the wires from the fixture to the house wiring. If your fixture has a bare ground wire, where you connect it depends on the wiring in your house.
7. Carefully slide the canopy up against the wall and tighten the set screw to hold it in place. Make sure the two parts of the canopy are properly aligned.
8. Once the fixture is installed on the wall back off the set screws F fit the glass shade and tighten the set screws to hold the shade in place. Install bulb.

• Light can be hung with glass shade facing up or down •

Installing the optional Sconce Frame.

1. Assemble light as shown on page one.
2. Before attaching the light to the metal cross bar (A) slide the sconce frame over the column so it sits as shown in Fig. 2
3. Follow fixture mounting instructions on page one.

Placement of Sconce

1. For positioning above the cabinet, there must be a minimum of 1" between the light shade and the path of the door swing. To ensure this correct placement install the sconce 8" min above the top of the cabinet door. See Fig. 3
2. To install sconce next to your cabinet use a minimum of 5 1/2" from the side of your cabinet to the center of the sconce, for Heirloom, or Bead style frames. Use 4 1/4" for no-frame or Classic and Laurel style frames. See Fig. 4
