FURNITURE TIPPING DETERRENT HARDWARE

Tipping furniture may injure young children. Use of this tipping restraint hardware is highly recommended.

When properly installed this hardware could provide protection against the unexpected tipping of furniture due to improper use.

WARNING

This hardware is only a deterrent. Adult supervision is the only proper deterrent to prevent improper use of any potentially hazardous product.

1. Attach one of the mounting brackets securely to the back top edge of the furniture using the short screw.
2. Find the stud in the wall and mark the location on the wall for mounting the second bracket using a 2" wood screw approximately 2" below the bracket mounted to the edge of the furniture.
3. If a stud cannot be found, purchase a "Hollow-Wall Anchor Bolt" and attach the second bracket to the wall using that bolt. Make sure to follow all instructions by the manufacturer.
4. Place the furniture so the bracket on the back edge is in line with the bracket on the wall.
5. Lace an end of the nylon restraint strap down through each bracket. Bring both ends together and slide the beaded end of the strap through the key hole shaped slot in the other end tightly. Pull down on the beaded end until it snaps locks into the keyhole.
6. Check to make sure the strap is securely laced and locked to the brackets.
