

PLANTERS

Benefits of Construction

Planters utilize cutting edge techniques to produce a resin in pot of superior quality with precise coloration texture and finish. Crafted from durable high-density resins this construction is an ideal alternative to heavy natural substrates that carry higher price points. Durability and affordability are hallmarks of all products.

Durable

Resin composite creates a durable planter that withstands seasonal temperatures and various patio elements including kids and pets.

Protected

Planters contain protectors for a long-lasting, true color that won't fade overtime.

Light Weight

Planters are light weight compared to traditional substrates, making it easier to move them around a patio.
