

4' Backless Bench

(Unassembled kit)

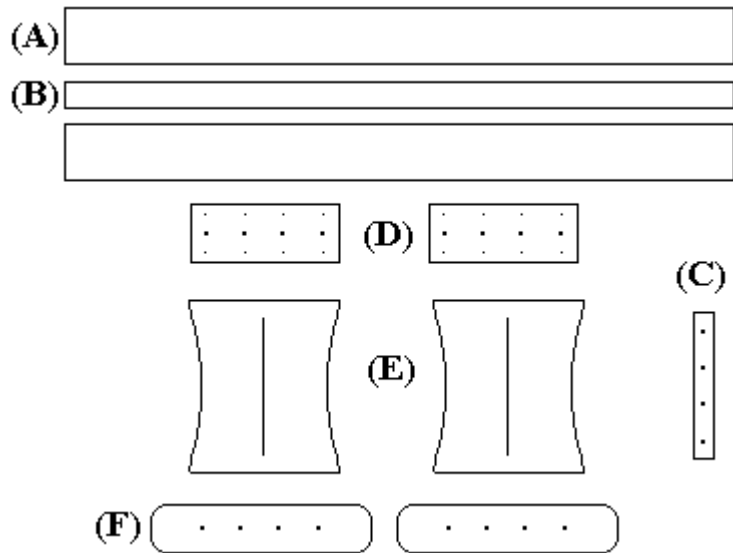

Tools Required: #2 Philips or Robertson screw driver.

Package Contents:

- (A) 2 Seat Boards
- (B) 1 Seat Board
- (C) 1 Cleat
- (D) 2 Leg Plates
- (E) 2 Legs
- (F) 2 Foot

Hardware:

- 2-1/2 inch zinc screws...16
- 1-3/4 inch zinc screws...30
- 1/4" wood spacer ...2

Step 1. Build Bench Top

- Using 1/4 inch spacer set out 3 seat boards with narrow board in center - good face down as illustrated above.
- Measure approx. 22.5 inches from end and attach cleat across seat boards using 1-3/4 inch screws.

Step 2. Build Leg Assembly

- Align middle set of holes in leg plate over top of leg and attach using 2 1/2 inch screws.
- Flip upside down - set foot on free end of leg and attach with 2 1/2 inch screws.

Step 3. Final Assembly

Please note: Leg plate may have additional drill holes that are not required for assembly of this product.

- Center each leg assembly across seat boards – position approx. 3 inches from ends and attach using 1-3/4 inch screws.
- Your new Bench is ready for use.
