LotusLantern APP Manual

1. Software Overview

1.1 Overview

LotusLantern is a mobile APP to control LED strip by both Apple and Android phones.

The traditional control ways like infrared, 433MHz, 2.4GHz and others old wired ways will be replaced by mobile phone control way with convenient, powerful and scalable features.

Through this mobile APP, you can not only control the color, brightness and color temperature of the LED strips but also set up all kinds of fancy flash mode; Also this APP can change the light of the LED strip according to the rhythm of the music. This APP can set and control several LED strips through Bluetooth and the operation is very simple, easy to learn and easy to use.

1.2 Features

- Adjust color LED strips with 60,000 colors to change color and brightness and adjust monochrome LED strips to change brightness and color temperature
- Play music or turn on a sound playback device, you can let the light change the color and brightness with the rhythm of music, the music rhythm beautiful
- Inside multiple setting mode for color change and control LED strips without mobile
- Long distance control with omni-directional antenna, and many-to-many group control mode
- Once the connection is successful, connect automatically next time

1.3 Performance

LotusLantern APP is easy for use as well as great compatible for all kinds of smart phones; After the actual test of hundreds of mobile phones verification, the compatibility is above 95% of mobile phones in the market. APP is small and convenient, it consumes less system resources, so the requirements of the mobile configuration are low. Control delay is small, the operation feel good, light control is smooth with people's visual sense.

2. Operating Environment

This APP program requires phones of system above Andriod 4.3 and iOS 8.0. Mobile phone configuration is not limited.

3. Instuctions

Note: Android version and iOS version download and use the same method, here in the Android version as an example.

3.1 APP Download

- Scan the QR code

iOS and Android systems can download the "LotusLantern" APP by scanning the QR code. Open the browser or other tools with "Scan QR code" function, scan the "LotusLantern" QR code as below:

3.2 App Operation

- (1) Click on the LotusLantern APP icon, enter the APP page:

(2) After entering the APP interface, if Bluetooth is not enabled, "an application wants to enable the Bluetooth function of this device." Click [Allow]

(3) switch to color and brightness interface:

A screenshot of a mobile application interface for controlling a smart lamp. The interface is dark-themed and features a large central color wheel. Annotations with arrows point to various UI elements:

- "Click to show the lamp list" points to a hamburger menu icon in the top left.
- "Switch the color wheel" points to a small color wheel icon in the top left.
- "Click to display setting view" points to a gear icon in the top right.
- "Lamp switch button" points to a toggle switch in the top right.
- "Adjust the color" points to a green dot on the outer ring of the large central color wheel.
- "Display the RGB value" and "Click to manual adjustment view" point to a box showing RGB values: R 98, G 193, B 111.
- "Click square icon to adjust the color" points to a square icon in the "Preset" row.
- "Click to shift the interface" points to a double-up/down arrow icon in the bottom navigation bar.

The interface also includes a brightness slider, a "Preset" row with icons for green, magenta, blue, purple, CCT, and W, and a "Classic" row with icons for yellow, white, cyan, red, green, and blue. The bottom navigation bar has icons for "Adjust", "Style", "Music", "Online", and "Mic".

(4) click to show the lamp list, view lamp list:
