

Assembly Instructions for Model 221734112

Model: 6 LAYER

 Step 1: use hanging board as a reference, mark the areas on the ceiling floor	 Step 2: use electrical drill to drill the holes
 Step 3: put the expansion plug into the hole	 Step 4: put self tapping screws on the expansion holes and screw in in the clockwise way.
 Step 5: like showing in the picture, hang the main body, connect the main wire on the light to the neutral and live wires in your home. Use wiring cap to tighten the wire connection in a clockwise way. Then hang the whole light.	 Step 6: install the arms, connect the red wire on the arm to the red wire on the main body, connect the blue wire on the arm to the blue wire on the main body. Then use the wire cap to tighten it in an unclockwise way. At last, fix the base unclockwise.

Important!

1. Pls put on gloves during installation, pls do not install the light on humid ceiling floor.
2. Pls strictly follow the installation menu when install.
3.  The projection distance between the light and the object needs to be at least 0.2M.
4.  Any light with this mark can be installed on the combustive surface.

Warning!

1.  Any light with this mark can only be installed indoor
2. During cleaning or checking, pls make sure the power has been cut off and no corrosive cleaner has been applied to the light.
