- Please confirm if the model of the sink is consistent with the one you purchased.
- Make sure that you have all necessary parts by checking the parts list. If any part is missing or damaged, please contact our customer service for a replacement.
- Inspect the sink prior to installation to make sure that it has not been damaged during shipping and the appearance of the sink is in good condition.
- Please keep the box and packaging materials until your product is completely installed. If you have any questions or require technical assistance, please contact our customer service.
- If for any reason this product does not meet your expectations, please be sure to repack this product in the original box and packaging material to avoid damage during transit.

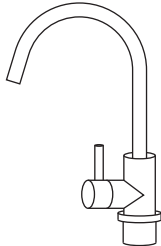

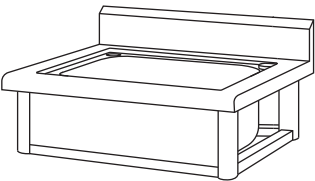

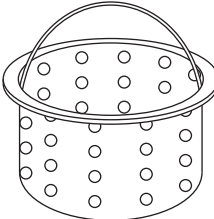

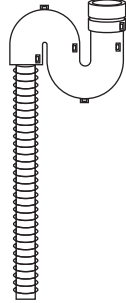

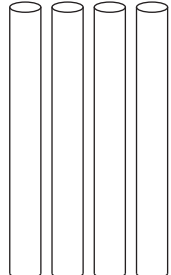

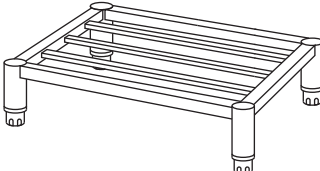

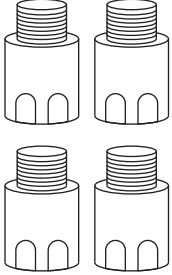

Product Dimensions

Overall Height: 38.6"
Inner Sink: 17"X13"X7.9"
Backsplash: 4.7"
Legs Height: 26.8"
Faucet: 13.8"

Package List

 Faucet x1 PC	 Water Hoses x2 PCS	 Sink Body x1 PC
 Drainer Strainer Set x1 PC	 Drainage Pipe Set x1 PC	 Supporting Legs x4 PCS
 Bottom Storage Shelf x1 PC	 Adjustable Feet x4 PCS	

Installation Instructions

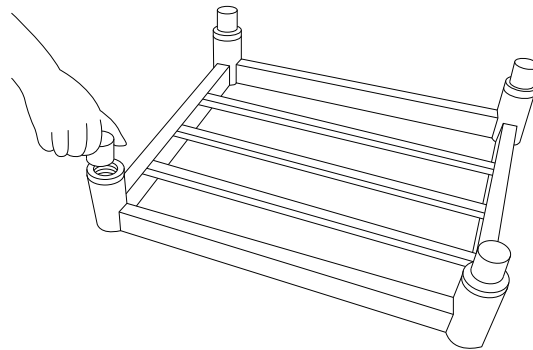

NOTE: It is better to install the product from the legs upward, so that no links or parts are left behind.

- THE BOTTOM PARTS

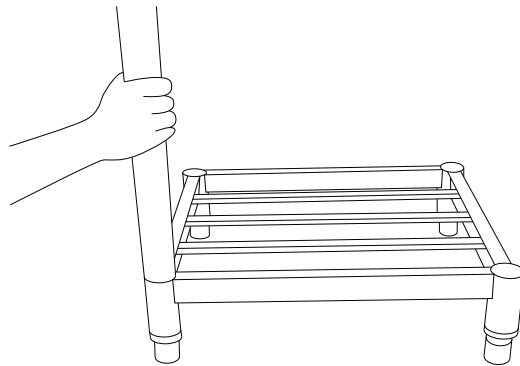

Step 1

Screw the four adjustable feet onto the bottom storage shelf.

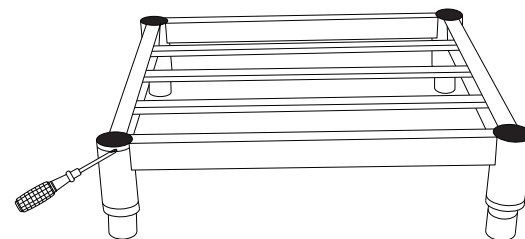

Step 2

Insert four supporting legs into the bottom shelf.

Warm tip

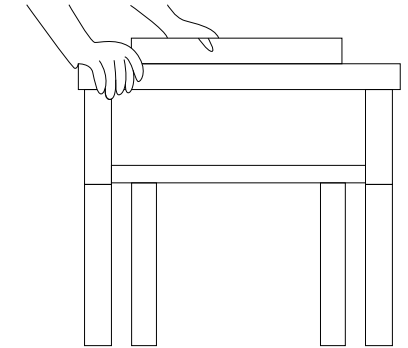

Please take off the four protection covers on the storage shelf before installation.

- THE SINK BODY AND DRAINAGE SET PARTS

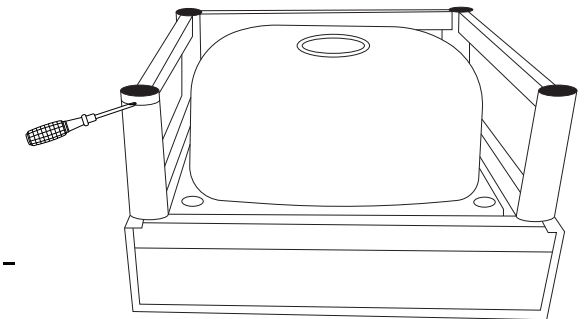

Step 1

Put the sink body onto the supporting legs.

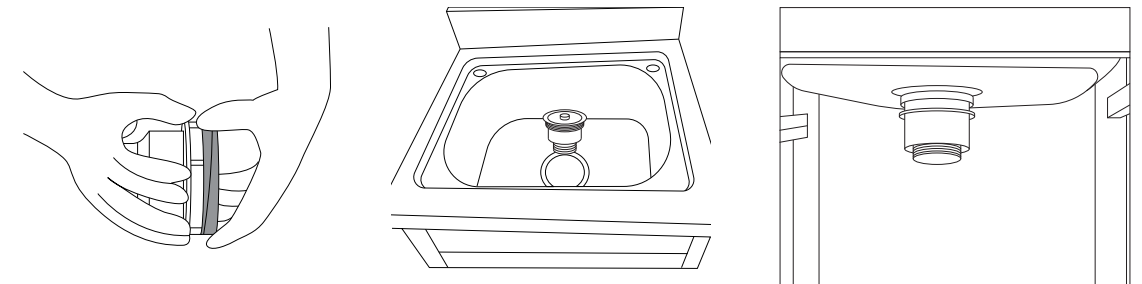

Warm tip

There are four brackets with covers around the basin to prevent product crushing while the sink is delivered, please take the covers out before installation to prevent assembly failure.

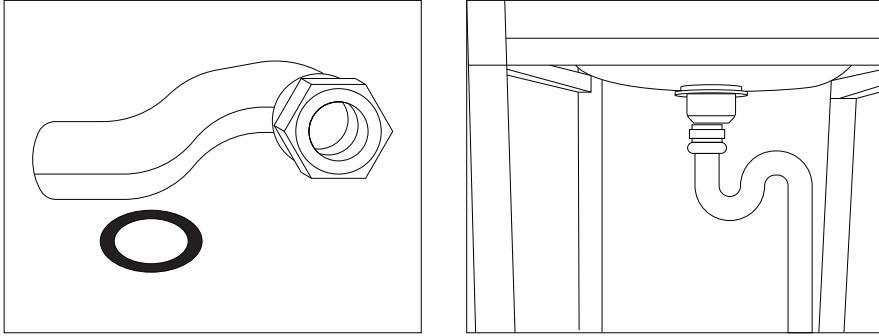

Step 2

Unscrew the plastic nut from the bottom of the drain strainer set first, then tuck the whole strainer set to the center hole of the basin, and finally screw the plastic nut onto the strainer set again.

Step 3

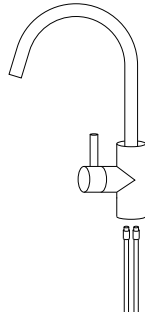

Put the silicone gasket into the drainage pipe set, and connect the strainer set and the drainage pipe set together, then you will get a whole, perfect drainage set.

- THE FAUCET PART

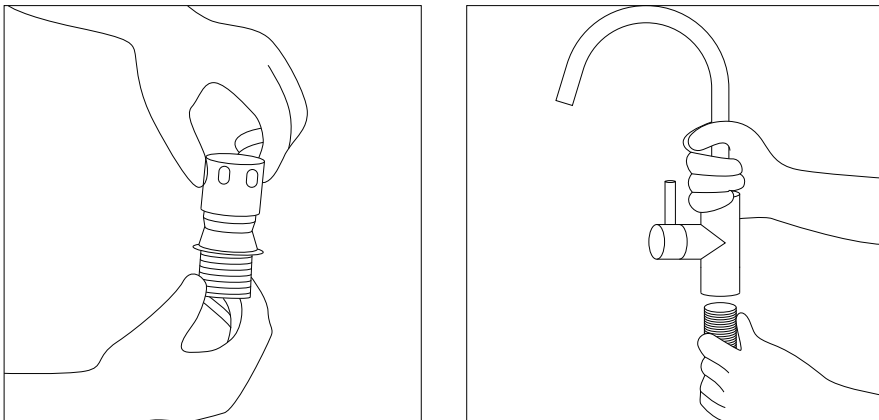

Step 1

Connect the two water hoses to the bottom of the faucet.

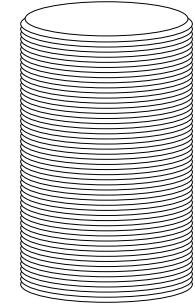

Step 2

Separate the stainless steel and hollow fixture from the stainless steel nut, then screw the fixture onto the bottom of the faucet.

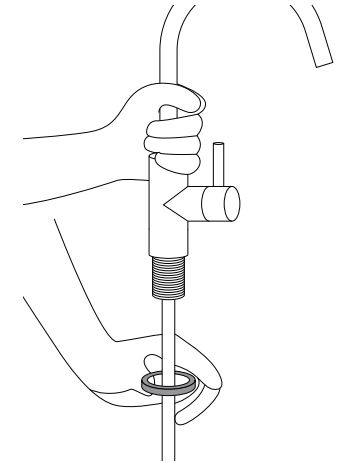

Warm tip

There are engraved metal stripes on the fixture, connect the fixture to the faucet with the end with less screw threads.

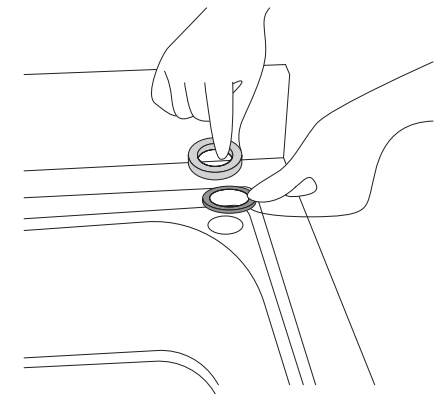

Step 3

Put the stainless steel and blue silicone ring through the fixture to stay close to the bottom of the faucet to prevent faucet from leaking.

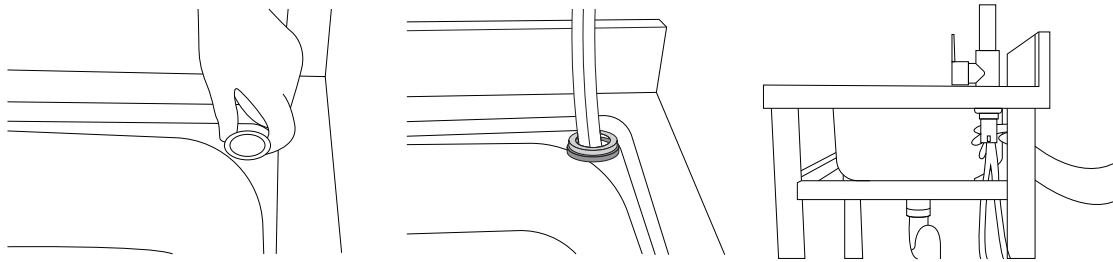

Warm tip

Keep the stainless steel ring on the top of the blue silicone one to prevent scratches on the basin.

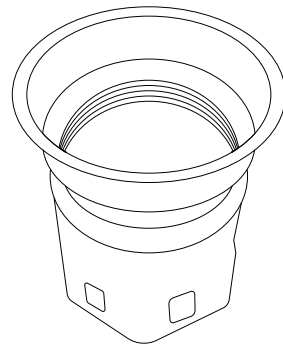

Step 4

Take off the two covers on the holes (on each side of the basin), and then tuck the water hoses into one of the two holes, and finally screw the nut to the fixture again.

Warm tip

Connect the stainless steel nut to the faucet with the end with screw thread, which is the one with the bigger hole.

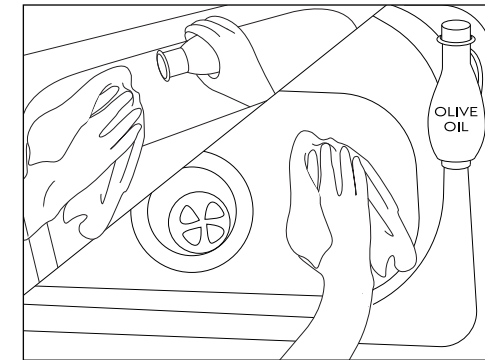

SECTION E

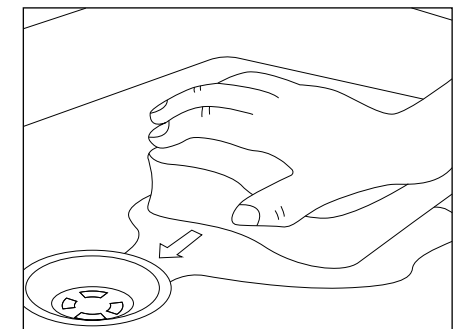

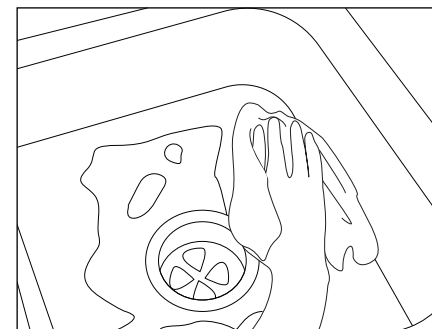

Cleaning & Maintenance

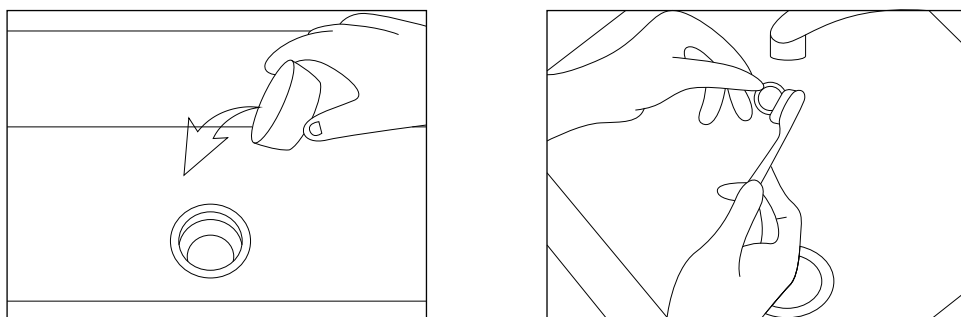

The cleaning of the sink should start from the basics, and a thin layer of oil can be applied to the inner wall when you first start using it. Try to isolate the surface of the sink from contact with corrosive substances.

The sink should be cleaned frequently. Please use a neutral detergent, gently scrub, then rinse with clean water, and use a sponge or rag to dry. Avoid using a steel brush or a rough brush to prevent metal particles from adhering to the sink wall, or it is easy to produce rust spots over time, or scratch the appearance of the sink.

Sprinkle a little salt on oily areas, then wipe up and down with waste plastic wrap, and wipe and rinse with warm water several times, to make the sink shine like new. The corners and drains around the sink can be wiped with a small brush or toothbrush dipped in soapy water, fine salt, or detergent, which can also achieve the ideal decontamination effect.

SECTION F

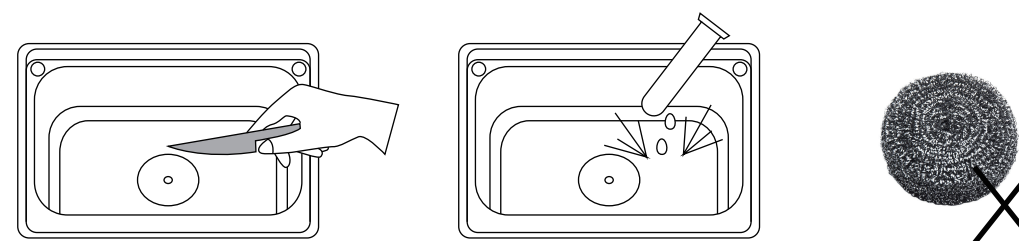

Warnings

- Do Not

When cleaning the stainless steel sink, it is best not to use a very oxidizing detergent, because it will react with the stainless steel sink, destroying the corrosion-resistant layer and causing rust on the sink surface.

The stainless steel sink should not be cleaned with grinding plates or wire balls. Try not to hit the sink with sharp utensils such as knives, forks, and cooking utensils, so as to avoid scratches on the surface and affect its surface beauty.

- Rust Spots

This sink is made of 304 stainless steel. If you see rust spots in your sink, it's due to external rust or iron particle contaminants. These rust particles attach to the sink surface, forming rust stains. Clean the rust stains with powder cleanser or sink cleaner and a dish scrubbing sponge. Scrub in the direction of the drain. Use a toothbrush for corners and edges. Rinse thoroughly with water.
