## Fog Along Coast 2

D2525S50497-4092

Fog Along Coast 2 is an abstract landscape that challenges the boundaries of perception and reality while evoking an ephemeral, dreamlike state. The scene in this large-scale painting seems to exist in perpetual twilight when the colors of dawn and dusk merge. Employing an array of contrasting tones, shapes, and lines, there is a sense of fields and a body of water.

A graceful companion to Fog Along Coast 1, Fog Along Coast 2's sensual color scheme in powder blue, champagne, cocoa brown, and khaki adds perspective and encourages the viewer's imagination to wander as their mind walks a leisurely trail along the water's edge. Part of the carefully curated ART by TA Collection.
