Note that the "gourd-shaped hole" here on the front crossbeam is close to the left cabinet

Step 44

Attention, please! Install accessory 5, which is the crossbeam, and press the legs on both sides to the lowest position.

⚠ If it is not pushed all the way to the bottom, it may cause the product to have uneven legs, which can result in an uneven tabletop.

Note: If the transmission rod doesn't fit smoothly into the hole of rod coupler, fine-tune fit with the wrench.

Step 49

Step1: Connect the controller of the lifting frame, namely accessory 6, to the plugs of the other two accessories 10 and 13, and then turn on the power.

Step2: Press the downward button on the controller for 5 seconds- the hand controller will display "RST". Release the button, then hold down the downward button again until the digital tube shows a number.

Step3: Press and hold the "Rise" button, raise the lifting frame to a certain height, then turn off the power and proceed to the next installation step.

Instruction Manual for JCB35M51C Controller (Version 1.0-English)

System Function Description:

1. Lifting and Lowering Function of the Height-Adjustable Desk:

Hold down the upward button, and the column will rise; hold down the downward button, and the column will lower. Release the button, and the movement will stop.

2. Memory Position Function:

Long press the "①/②" button for 3 seconds until the digital tube display flashes. After the number flashes 3 times and stops, the current height will be successfully stored in the corresponding memory position. Short press the "①/②" button and release it, and the tabletop will automatically move to the height of the memory position. During operation, pressing any button can stop the movement.

3. Reset Function:

(1) Function Description:

The system needs to be reset under specific circumstances.

These circumstances include:

- ① When used for the first time, the system will enter the reset state after being powered on.
- ② Active reset will put the system into the reset state.
- ③ A system abnormality will cause the system to enter the reset state.

(2) Operation Method:

Bottom Reset: Hold down the downward button until it reaches the bottom. Then release the button, and press the downward button again for 5 seconds—the hand controller will display "RST". Release the button, then hold down the downward button again until the digital tube shows a number.
