**Step One:** Insert the pre-installed parts 4 and 4A into the gap below the fabric cover.

**Step Two:** Use connector D to join the reinforcing rods with the legs. When installing L-shaped ground stakes, it's important to ensure that the stakes are inserted diagonally into the soil to form an X shape with two stakes crossing each other.

The windproof rope must be tightly fastened with the fabric sleeve and round-headed ground nails. Moreover, the round-headed ground nails need to be inserted diagonally in the direction beyond the canopy into the soil to achieve the maximum effectiveness.

# 9

Grassy surfaces

Cement surfaces

To improve wind resistance,  
**be sure to complete this installation step. If expansion screws or ground nails are not installed, strong winds may topple the gazebo.**  
 Expansion screws are essential for stability on cement surfaces and ground nails are for grassy surfaces.  
 Ground nails are included in the package while expansion screws are not provided.

Installation Completed

How to make the entire greenhouse more sturdy in strong winds or heavy snow?

- 1.Ensure all screws are tightened.
- 2.Confirm that ground nails and windproof ropes are installed as instructed.
- 3.Use stones or other heavy objects to weigh down any excess fabric around the perimeter.
- 4.If the canopy is erected on concrete ground, it is recommended to use expansion screws.
