

Installation steps

Step 1. Two triangular boards are installed on both sides, and the large rectangular panel is placed on the back, corresponding to the card slot on the side of the triangular board. Simply insert it into the card slot; You need to install one side first, and then install the other side after all the boards are installed;

Step 2. Two small rectangular panels are installed in the card

slot in a top to bottom manner; (The installation positions of the card slot are one horizontal and one vertical);

Rectangular panels with card slots are installed vertically, while rectangular panels without card slots are installed horizontally.

The remaining four rectangular panels are installed in the same way.

Step 3. After installing one side of all panels, install the other

side and install it in the corresponding slot with the triangular panel.
