STEPS TO ASSEMBLE THE RACK

1. Unpack and remove all parts from the box. If there are missing or broken parts, please contact our CUSTOMER SERVICE.
2. Screw the LEVELING FEET (B) into the legs of each SIDE FRAME (A).
3. Insert the hooks on both sides of the SHELF (D) into the lower brackets of the side frames.
4. Repeat step 3 for the second shelf.
5. Once all shelves are securely in place, adjust the leveling feet by screwing them in or out to obtain a level rack.

STEPS TO STACK THE RACK

1. Build another rack following the instructions on the left. However, do not install the LEVELING FEET (B) on the second (top) unit.
2. Screw the STACKING PINS (E) into the legs of the top unit. Remove all CAPS (C) from the original (bottom) unit.
3. Lift the top unit up, lining up the pins with the holes at the four top corners so that the pins can be inserted into them. Be sure everything is in alignment and then press the top unit down firmly so that it fits tightly onto the bottom unit.

NOTE: Drawing shows 2 units stacked vertically. Do not exceed maximum height of 2 stacked units.

WARNING: Do not sit on the rack. Do not drop heavy items on the rack. Place heavier items on the lower shelves and lighter ones on the top shelves. Do not move the rack while loaded. Do not move the rack by lifting the shelf, use the tops of the side frames instead.

WEIGHT CAPACITY: 25 lb per shelf
