

Finn Coffee Table

2 People

10 minutes

PARTS

- Wood Body
- Decorative Top
- Base / Toe kick

DIRECTIONS

Base/ Toe Kick Installation Guide:

1. Preparing the Table:

- Flip the table to access its underside. This position exposes the base for the installation process.

2. Removing Existing Feet:

- Remove the 4 adjustable feet from the base of the table. This will leave four holes needed for the base installation.

3. Aligning the Base/ Toe Kick:

- Position the base so its holes line up with those on the table's base left by the removed feet.

4. Securing the Base:

- Attach the base to the table using the screws provided in base box.

5. Finalizing the Installation:

- Return the table to its upright position now that the base is securely attached. Your table is now assembled and ready for use.

Top Installation Instructions:

• Non-slip Pads:

- Your table top comes with four non-slip pads on its underside. These pads ensure the top stays securely in place on the table's body, preventing any sliding.

• Positioning the Table Top:

- Align the table top with the body of the table, making sure the edges of the top match perfectly with the edges of the table body for a clean look.

Important Installation Note:

- If your table includes both a detachable top and a brass base, ensure to attach the brass base first before setting the top on the table's body. This order of assembly ensures the table's stability and proper alignment.
