

Features

- Effectively reduces contaminants including arsenic, fluoride, TDS, bacteria, virus, lead, mercury, chlorine and pharmaceuticals in your cold water.
- Filter head automatically turns off water supply when cartridge is removed.
- Replacing RO sediment pre-filter, carbon block CTO filter and carbon block VOC filter every six months keeps filtration system performing effectively.
- Postage-paid recycling program for used cartridges to reduce solid waste to landfills.
- For cold water use only.

Material

- High-impact plastic construction.

Installation

- Under-sink.
- Quarter-turn twist cartridge for easy installation and replacement.

Included Components

Additional Components:

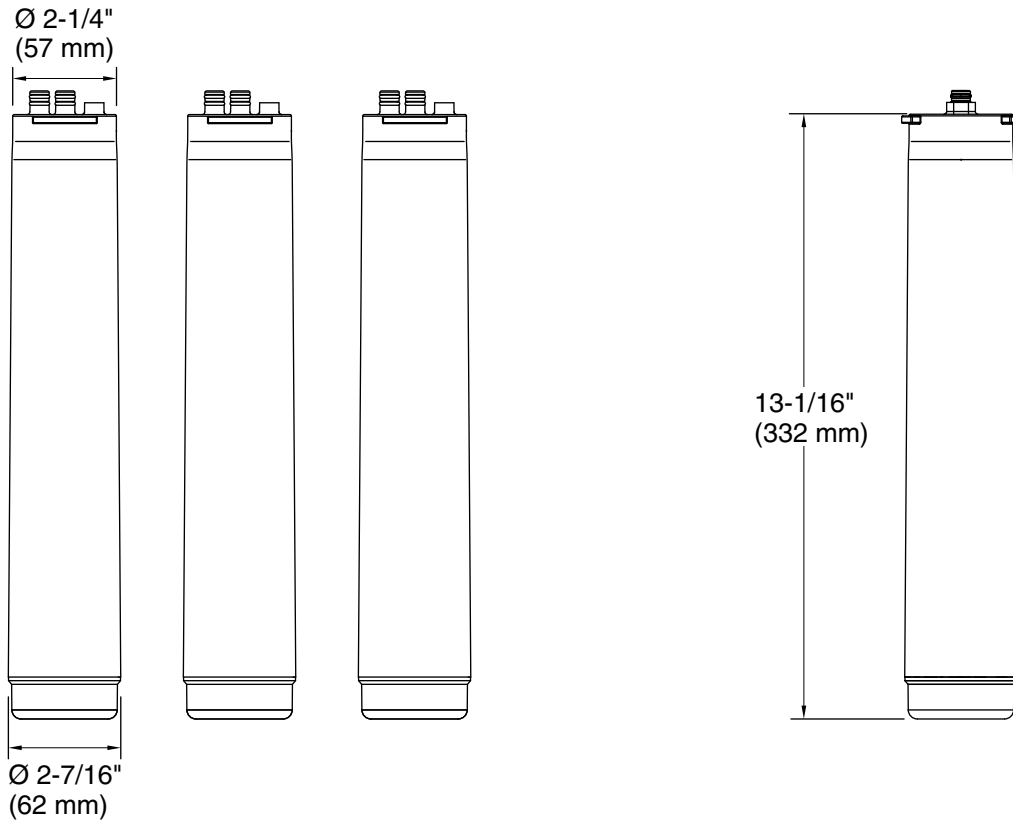

- K-22157 Reverse osmosis (RO) sediment pre-filter replacement
- K-22158 Reverse osmosis (RO) carbon block CTO filter
- K-23334 Reverse osmosis (RO) carbon block VOC filter

**Codes/Standards**

None Applicable

**KOHLER® Water Filter Systems
Five-Year Limited Warranty**

See website for detailed warranty information.

**Technical Information**

All product dimensions are nominal.

Notes

For cold water use only.

To ensure the filter continues to reduce contaminants effectively, it is recommended that the filter gets replaced every 6 months.

Application guideline/water supply parameters:
Water Pressure: 40-100 psi (276-689 kPa) Water
Temperature: 40-100°F (4.4-37.8°C) Capacity:
230 gal (871 L)
