Se você optou por uma de nossas linhas em madeira, observe que cada componente tem características únicas, como nós, variação de veio e de tonalidade. Esses são traços inerentes à madeira e compõem o visual natural dos produtos.

### Cuidados

Cuide com carinho do seu móvel, para que ele dure muitos anos.

Temperaturas altas podem causar movimento na madeira e alteração de cor, portanto evite colocar seu móvel muito próximo a aquecedores ou deixá-lo muito tempo exposto a sol intenso. Evite umidade. O móvel que você está adquirindo é para uso interno e não deve ser molhado. Se algum líquido for derramado sobre o mesmo, enxugue rapidamente.

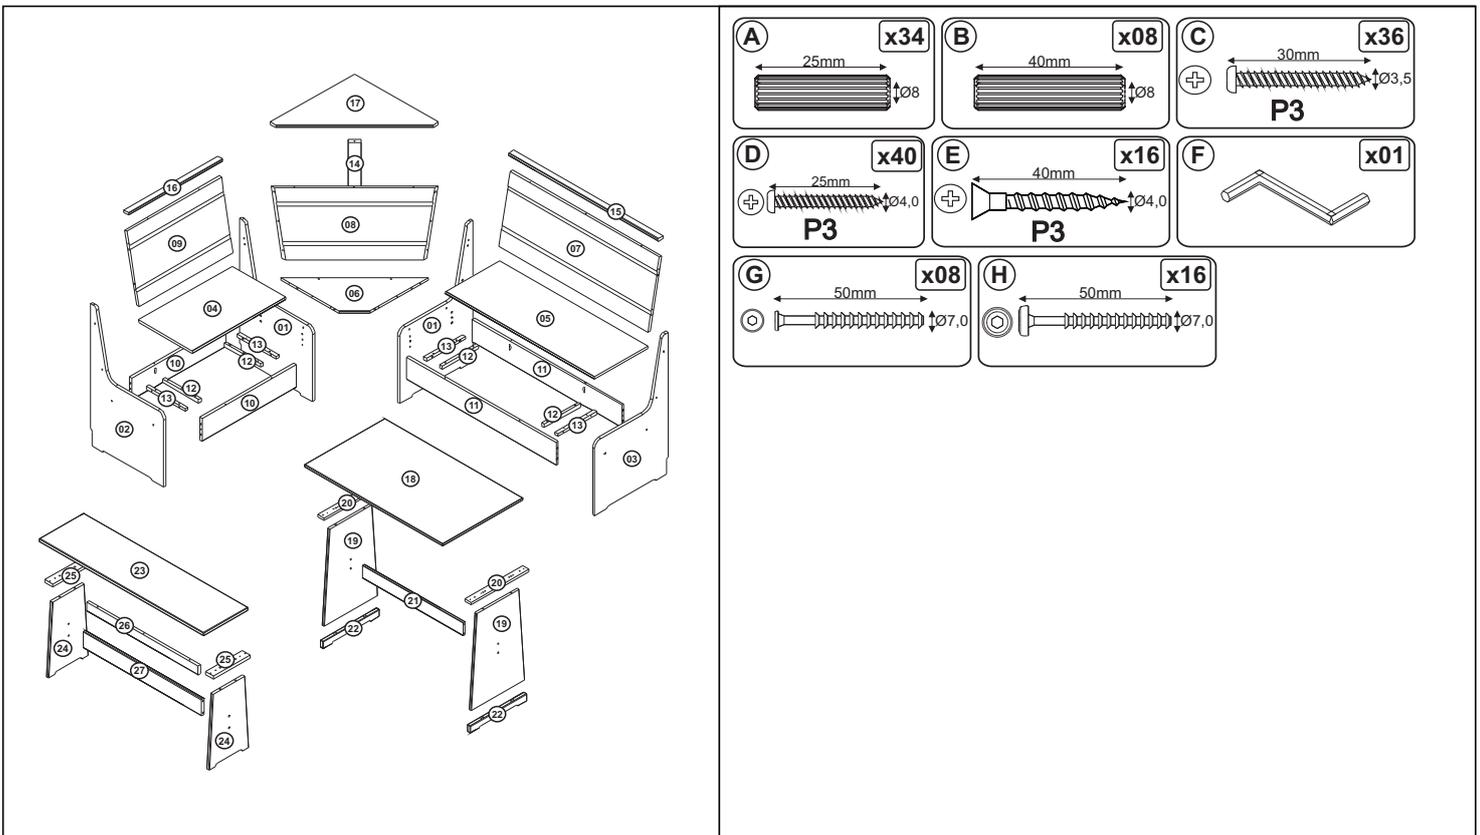

Para mudar de lugar, feche portas e gavetas e erga o móvel, evitando arrastá-lo.

### Manutenção

Limpe as superfícies com pano seco. Se a peça que você adquiriu for em cera ou verniz, você pode ocasionalmente utilizar cera incolor ou lustra móveis em pequena quantidade. Recomenda-se a aplicação de tempos em tempos de lustra móveis ou cera na parte externa das laterais de gavetas e corredeiras para assegurar que continuem deslizando com suavidade

Boa sorte com sua aquisição.
