

暂停

这个拧在水泵上面  
Mounted on a water pump

拧好再卡这个白色的管子  
Connect the white pipe.

暂停

这个是双侧进水的

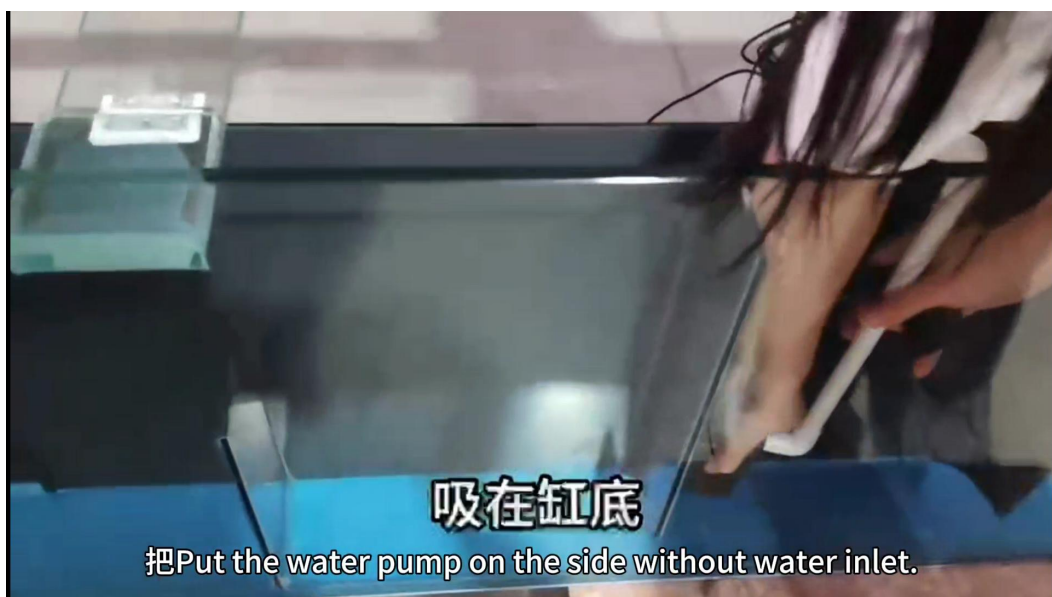

This is water from both sides.

播放

然后我们就把水泵放在中间

Put the water pump in the middle

吸在缸底

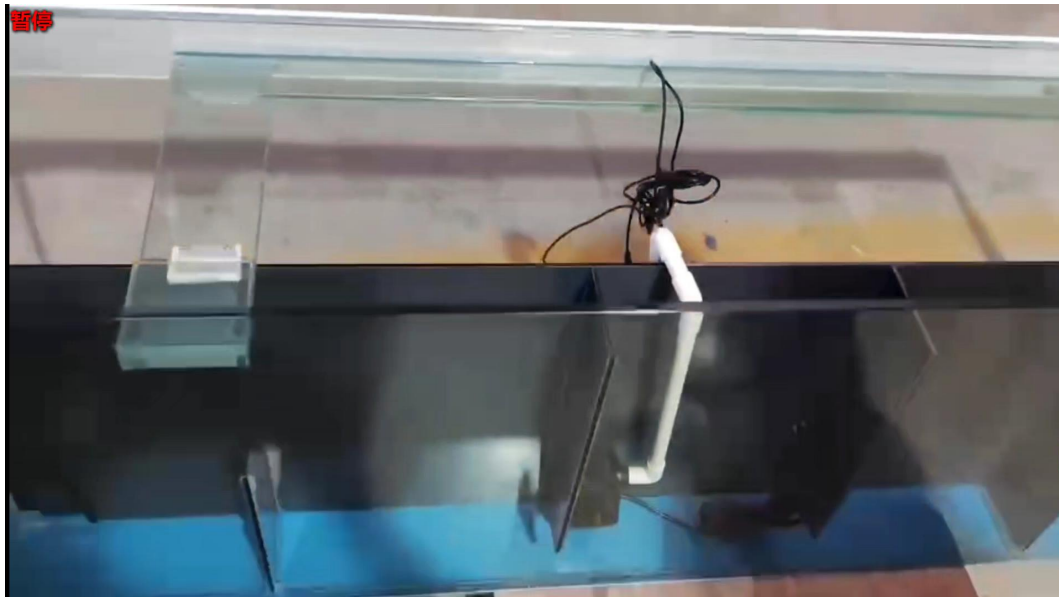

把Put the water pump on the side without water inlet.

暂停

这个出水口朝缸里就可以了  
The water outlet faces into the cylinder.

暂停

我们用过滤棉把滤材包一下  
Use filter cotton Wrap the filter material

**滤材我们放在进水口隔壁的这一格**  
Put the filter material in the compartment next to the water inlet.

**我们这个 暂停 是标配来的**  
Put the filter material in the compartment next to the water inlet.

**滤材啊都是统一的**  
You can add your own filter material according to the size of the cylinder.

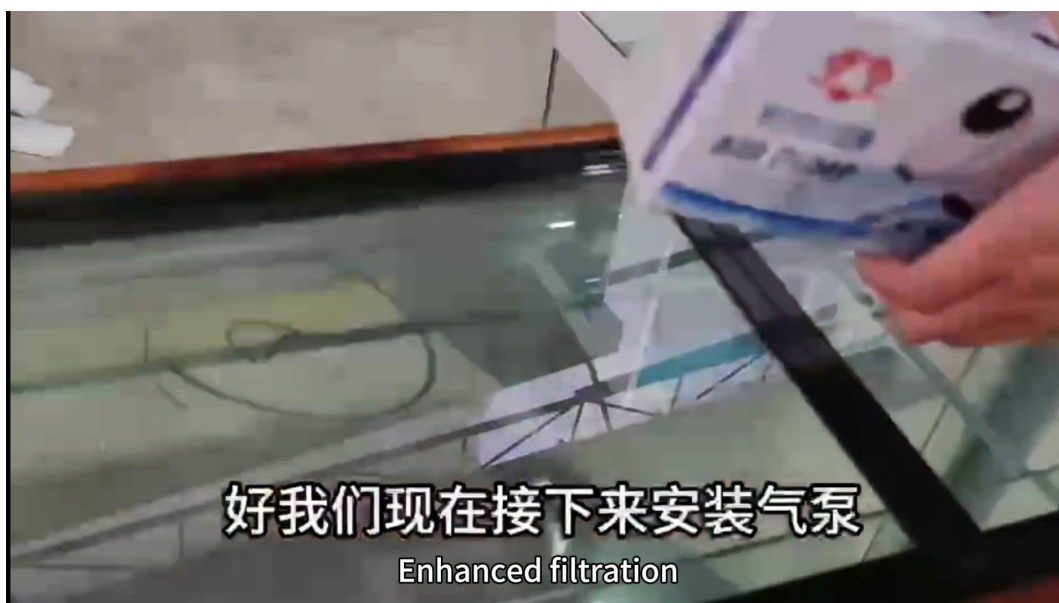

**大家可以按缸的大小来自己**

You can add your own filter material according to the size of the cylinder.

**加装滤材可以把过滤槽放满**

You can add your own filter material according to the size of the cylinder.

**好我们现在接下来安装气泵**

Enhanced filtration

注意这个管子一根接在假山

One connected to the rockery.

那这个假山上有个接口

我们再另外一根接在这个气泡条

A bubble-connected strip

把进水口穿过去

我们拉到后面来

Pull to the back

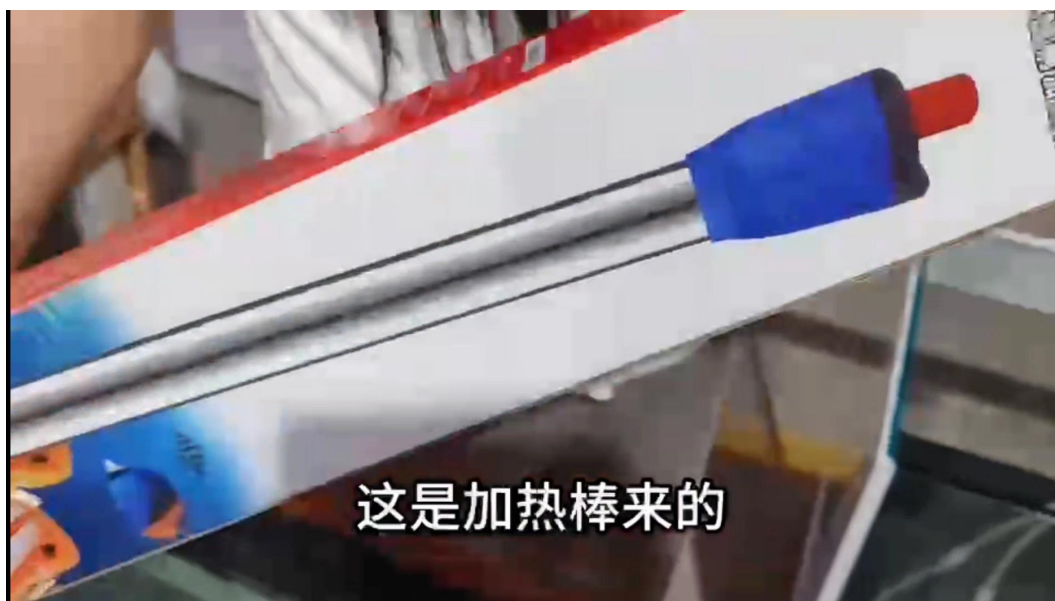

这样比较美观一点

More beautiful

这是加热棒来的

养热带鱼的才需要用到

Raising tropical fish requires heating.

冷水鱼的话就没必要装了啊

Raising tropical fish requires heating.

调到鱼需要

这个是可以转动的啊

The temperature can be adjusted

Put it behind the cylinder

注意这个一定要在水里啊

The heating rod must be put in water.

下一个我们装灯管

Lamp tube

把这个拆掉

灯管里面都是有二个吸盘的啊

There are two suction cups in it. Take them out together.

如果没有找到的话

There are two suction cups in it. Take them out together.

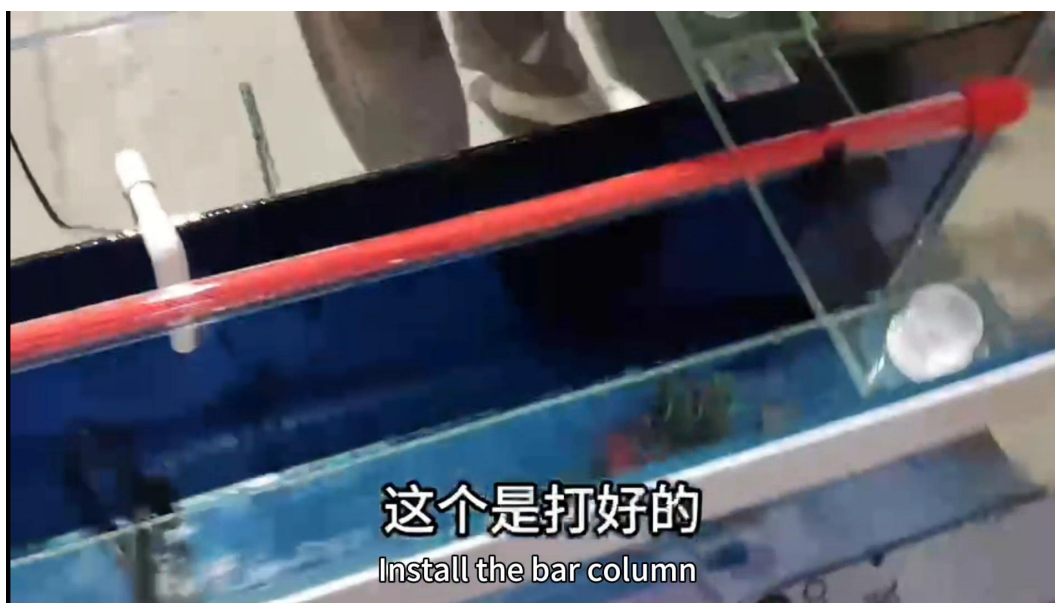

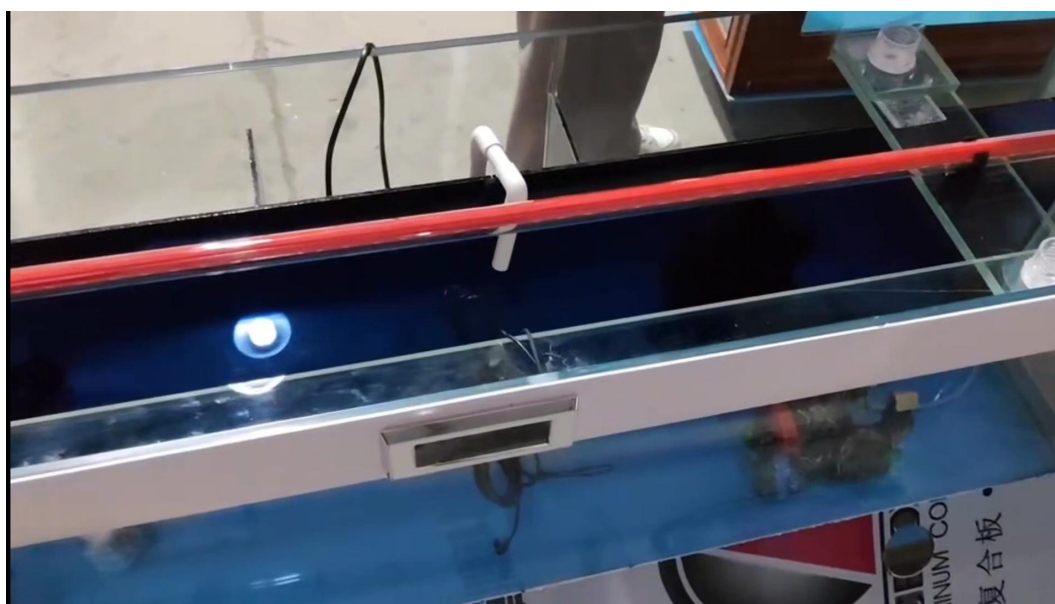

就大家这么转一下就可以了

There are two suction cups in it. Take them out together.

按住玻璃槽上面就可以了随便放

Just suck it on the fish tank.

这个是打好的

Install the bar column

我们把这个拧上去

Install the bar column

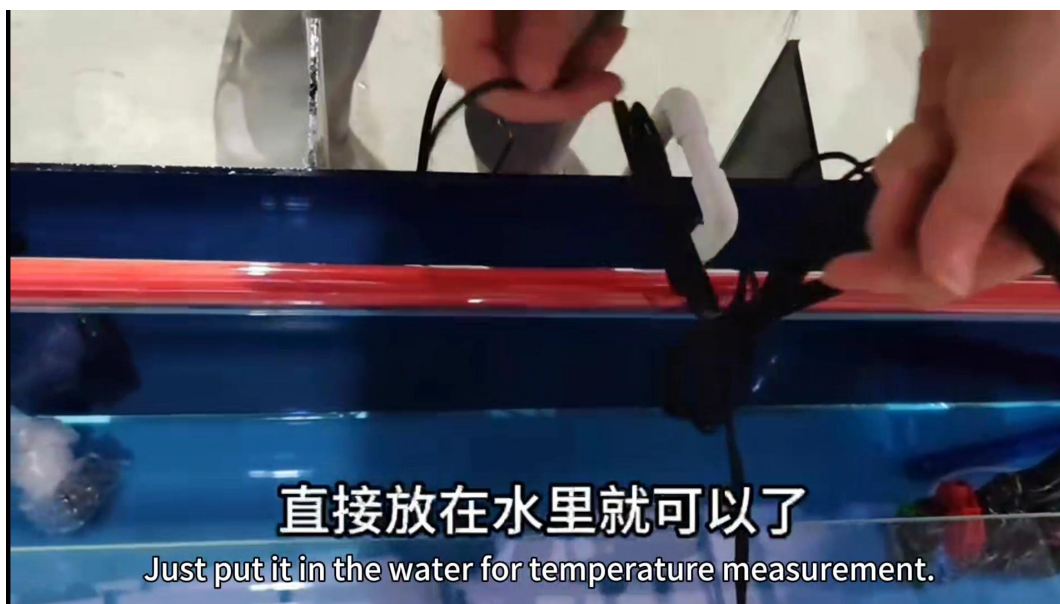

拧上去之后放上顶部的吧台玻璃啊

Just put the glass on it after it is installed.

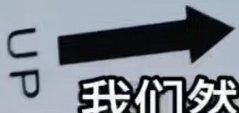

一条是显示屏的电源线

There is a power line and a temperature measuring line.

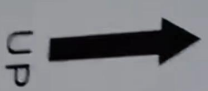

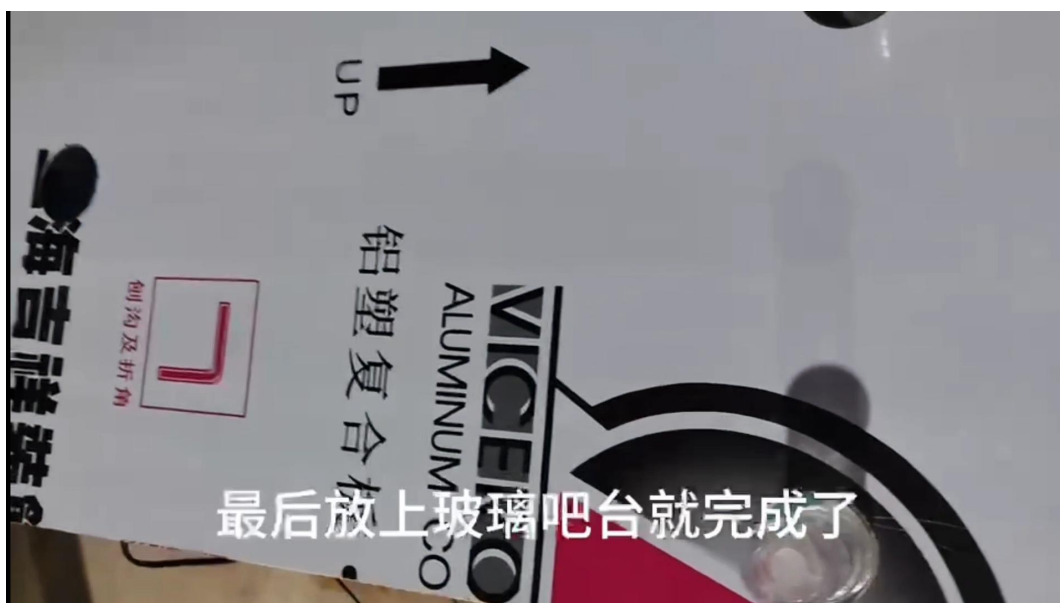

直接放在水里就可以了

Just put it in the water for temperature measurement.

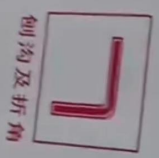

我们然后把中间这个盖板放上去

Put it on and it will be installed.

海吉祥

铝塑复合板

VICIHO  
ALUMINUM CO.

最后放上玻璃吧台就完成了

**END**
