Assembly Steps

This Chair has multiple parts and may require up to 30 minutes to assemble. To give you an overview of the Chair parts, the above picture is to help you put the various parts into perspective. Please read through the instructions below to familiarise yourself with the parts and steps before assembly.

Assembly Steps

Step 1

Open the carton and place all the parts onto a clean, non-marring surface.
Align the Right Leg (B)&Left Leg (C) onto Seat (A),
Attach Right Leg (B)&Left Leg (C) using Bolts(1) and Washers(2) with Allen Key(3).
Tighten all the Bolts.

Note: Occasionally some of the rope will cover the Bolt points, preventing easy assembly, the rope should not be cut but moved away from the mounting positions.

Step 2

Place the Chair on a **LEVEL SURFACE** to check for wobbles.
Adjust the Leveler to ensure chair stability.

Step 3

Place the Seat Cushion(E) and Back Pillow (D) on the Chair.
Your Chair is ready for use.
This Chair can only be used on a flat, level surface.

Questions & Answers about Proposition 65

• What is Proposition 65?

Proposition 65 requires businesses to provide warnings to Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm. These chemicals can be in the products that Californians purchase, in their homes or workplaces, or that are released into the environment. By requiring that this information be provided, Proposition 65 enables Californians to make informed decisions about their exposures to these chemicals.

Proposition 65 also prohibits California businesses from knowingly discharging significant amounts of listed chemicals into sources of drinking water.

Proposition 65 requires California to publish a list of chemicals known to cause cancer, birth defects or other reproductive harm. This list, which must be updated at least once a year, has grown to include approximately 900 chemicals since it was first published in 1987.

• What types of chemicals are on the Proposition 65 list?

The list contains a wide range of naturally occurring and synthetic chemicals that include additives or ingredients in pesticides, common household products, food, drugs, dyes, or solvents. Listed chemicals may also be used in manufacturing and construction, or they may be byproducts of chemical processes, such as motor vehicle exhaust.

• What does a warning mean?

If a warning is placed on a product label or posted or distributed at a workplace, a business, or in rental housing, the business issuing the warning is aware or believes that it is exposing individuals to one or more listed chemicals.

By law, a warning must be given for listed chemicals unless the exposure is low enough to pose no significant risk of cancer or is significantly below levels observed to cause birth defects or other reproductive harm.
