

# Installation Instructions

| parts list                                                                                                                                          |       |                                                                                      |                                         |  |  |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|-------|--------------------------------------------------------------------------------------|-----------------------------------------|--|--|
|                                                                    | X1    |    | X4                                      |  |  |
|                                                                   |       |                                                                                      | X6                                      |  |  |
|                                                                   |       |                                                                                      | X11                                     |  |  |
|                                                                    | X4    |    | M8 X1                                   |  |  |
|                                                                    | M8 X1 |    | M8-30 X12<br>(Installed on accessories) |  |  |
|                                                                    | X1    |                                                                                      |                                         |  |  |
| Step1:Check if the accessories are complete                                                                                                         |       |                                                                                      |                                         |  |  |
| Firstly, remove the screws from the pipe fittings and install them according to the reference steps                                                 |       |                                                                                      |                                         |  |  |
|                                                                  |       |  |                                         |  |  |
| Step2:Take out the square tube, connect and install the brackets on both sides together, and fix them with screws on both sides                     |       |                                                                                      |                                         |  |  |
| Do not tighten the screws during installation, and tighten them after installation is complete                                                      |       |                                                                                      |                                         |  |  |
|                                                                  |       |  |                                         |  |  |
| Step3:Install the remaining long pipes into the holes on each layer of the bracket, install the wheels at the bottom, and complete the installation |       |                                                                                      |                                         |  |  |
