

SIMON PEARCE

ENJOY YOUR NEW PENDANT!

Please unwrap your pendant packaging upon receipt to confirm your item has arrived safely. If your item is damaged or you have any issues with this purchase, please contact your retailer immediately. **Once pendants are installed, they are not eligible for return. Uninstalled pendants that are returned will incur a 15% restocking fee.** Thank you!

INSTALLATION NOTES

We recommend two people work together on installation in order to avoid scratching.

1. Screw the cable gripper into the crossbar in the ceiling box.
2. Place lighting hardware inside the glass pendant and slide the power wire and the suspension cable through the opening in the top of the glass pendant.
3. Hold the glass pendant up as close to the ceiling box as possible and insert the suspension cable into the cable gripper so that there is approximately one foot of distance between the ceiling box and the top of the glass pendant.
4. Let the weight of the glass shade hang on the lighting hardware.
5. Once the desired hanging distance is established, cut the excess power supply cable. Be sure to leave enough length so that the weight of the glass pendant is supported by the suspension cable and not by the power supply cord.
6. Wire the pendant into the ceiling box.
7. Release the cable gripper and slide the suspension cable back out of the cable gripper until the desired height of the pendant is reached. Cut the excess suspension cable.
8. Follow the remaining steps according to the picture on the hanging kit.
