PREPARATION BEFORE INSTALLATION

Desktop 1

Base 1

Large screws 4

Small screws 8

Wrench 1

*Component and accessory inspection:

Confirm that all components and accessories are complete.

The main components include a desktop, a base, and a parts package.

Please carefully check the drawers to ensure that no accessories are missing.

Self-provided tools:

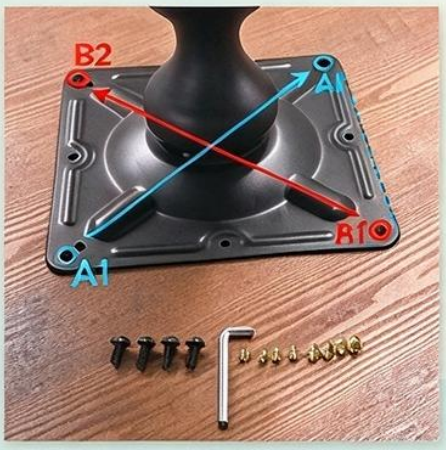

Electric screwdriver (for installation)

Crowbar (for opening the box)

BASE INSTALLATION

There are four reserved holes at the bottom of the desktop. Align the larger holes on the outside of the four corners of the base with the reserved holes, Use large screws to cross-fix Al and A2 first, and then fix B1 and B2 in the same way with a wrench.

Atter the four reserved holes are properly fixed, take out the small screws and use an electric screwdriver to fix the remaining & reinforcement holes in sequence, The installation is completed.

Installation completed
