

## METAL WALL ART

**Thank you for your order!**

Please note that each and every sale of artwork, be it an oil painting, canvas art print, metal art, wood art, designed clock or one of our textile items supports an artist and allows them to live through their passion.

Every creation started with an artist's inspiration. A vision of what could be where nothing currently is. The deep desire to express one's own creativity and share it with the world. Through our many product lines, we allow artists and designers to express their ideas and creativity across many mediums.

## Metal Hanging Instructions:

Please follow the instructions below for Metal wall art:

You will need :

Screw Driver

Measuring Tape

Screws  
*(included in your order)*

Hooks

### STEP 1:

Determine where you would like to hang your metal art. Your metal art has the wall bracket built into the actual wood frames.

The top part of each frame is designed with a lip, which you will hang over the included screws.

### STEP 2:

For multi panel art, we recommend using 2 screws per panel.

For single panel art, we recommend using 4-6 screws, depending on the size.

### STEP 3:

Using a measuring tape, measure the distance from your first set of screws to the desired placement of your second panel, mark the wall and insert the next set of screws.

Repeat the same measurement and screw insertion process per number of panels to ensure even spacing.

For the single panel art, measure the distance between the first and second screw and repeat per number of desired screws.

Lip for hanging over screw
