

Installation Steps:

Thank you for using our products. Please read the operating

instructions before installation. Please keep this operation manual as a reference. Before installing this product, please disconnect the power supply. We recommend that a professional electrician perform the installation.

1. Remove the plastic nut under the ceiling disc, then put the nut through the lamp head wire, then put the lamp head wire through the hole in the middle of the disc, adjust the required length, and finally twist the plastic nut to fix it firmly. (Plastic nut must be twisted tightly)
2. Fix the pegboard in the reserved installation box.
3. Connect the black wire to the black power wire and the white wire to the white power wire with wire caps (provided) and wrap tightly with insulating tape. 5. Connect the ground wire of the light to the ground wire of the junction box. If the house does not have a ground wire, connect to the green screw on the wall plate. (Screw label: GND). Carefully insert all wires into the junction box.
4. Secure the light to the suspension plate with the round nut.
5. Insert the A glass rod into the outer ring hole of the lamp body and the B glass rod into the inner ring hole of the lamp body.
6. Attach the bulb to the lamp, making sure it makes good contact.

Attention:

1. The input power of the lamp is AC 120V 50Hz.
2. Any behavior that violates residential fire protection regulations is prohibited.
3. Under no circumstances should the lamps be covered with heat insulation pads or wooden materials.
4. Before maintenance, make sure that the power supply of the lamp has been cut off and the light source has cooled down. Before powering on, make sure that the light source and the lamp holder are connected correctly.
5. Please wipe with a towel or flannel, and clean the lamp body with a non-corrosive detergent. Do not scrub directly, wipe with water or a damp cloth.
6. If you have any questions about this manual, please consult a qualified lighting installation engineer.
