Please carefully read and this manuail at safe places for better protecting your rights and interests.

OPERATING METHODS

- 1.Upward opening of handle can increase water discharge while downward opening of handle can cause decreased water discharge, finally closing water flow.
- 2.After upward opening of handle, as a rule, leftward turning adjustment can increase hot water supply and rightward turning adjustment can result in increased cold water supply. If hot and cold water pipe is connected reversedly during installation, something opposite might happen compared to the above circumstances.
- 3.When the handle of triad faucet is opened upwardly, under normat condition water current flows out from the bubble former; Yieding water of spraying nozzle can be switched by pulling up tension lever head, then bubble former stops water flow.
- 4.During operating, it is only required to lightiy rotate the handle of switch moving at 90 C to specific position. Do not open and close with powerful strength to avoid the damage due to excessive overexertion.
- 5.Under low water source pressure, simpiy unscrew bubble former to take off inner throttling sheet for increasing faucet water discharge. When water pressure is normal, throttling sheet can be installed again.
- 6.After using this product for a period of time, all filter screens must be taken down to be washed before being installed again.

INSTALLATION INSTRUCTIONS

This product has been tested and adjusted to be qualified when they were delivered out of the factory. Please do not arbitrarily disassemble and install it so as to avoid damaging its primitive performance. Installation must be made by experienced and qualified professionals. During installation, faucet should not be knocked by hard object, do not remain cement or glue inside the surface to avoid damaging glossiness of surface clad layer, and be sure to clean impurities inside the pipe before installing faucet. As there might be some stains inside water supply pipe, it must be flushed away with water before the installation of faucet to avoid affecting normal operation of this product due to the clogging of stains. After installation of this product and normal use of water, unscrew bubble former with spanner before further flushing impurities inside the bubble former to make water yielding more beautiful. Check to see whether each joint is closely connected and pipeline leaks or not.

MAINTENANCE

In order to keep the brightness of faucet, please follow simple maintaining instructions below:

- ☒ Rinse faucet with clean water;
 - ☒ Wipe and dry faucet with soft cotton cloth;
 - ☐ Do not use any abrasive acidic shaggy detergent;
 - ☐ Do not clean faucet with polished abrading agent, soap, coarse cloth or paper handkerchief;
- Regular cleaning of faucet can reduce the needs of large scale cleaning and polishing work.

If large-scale cleaning work is needed, please follow the procedures below:

1. Try to clear surface dirt and dirty layer with clean water and soft cotton cloth;
2. Any kind of the following detergents can be used to clean surface dirty layer and stain:
 - ☒ Mild liquid detergent;
 - ☒ Colorless glass detergent;
 - ☒ Mild nonacid non-abrasive liquid or completely soluble powdery detergent (mixing according to manufacturing instructions);
 - ☒ Non-abrasive polishing liquid.
3. After cleaning, please clean faucet immediately again with clean water to clear all remaining detergents, and wipe and dry it with soft cotton cloth.

Please contact local our brand distributors or franchised service dealers or call our company directly for any questions or inquiries about maintenance of faucet.
