

Installation Steps:

Thank you for using our products. Please read the operating instructions before installation. Keep these instructions for reference. Disconnect the power supply before installing this product. Installation by a professional electrician is recommended.

1. Open the ball nut at the bottom of the lamp body and fix the lamp arm facing upwards on the lamp body with a wrench.
2. Secure the square tube to the mounted arm with screws in order.
3. Install the round iron piece through the wires to the screws on the top of the fixture, and then use the screws to secure the round iron piece and the square tube together in turn.
4. Attach the iron ring knob on the ceiling chassis to the screw on the lamp body.
5. Attach the mounting bracket to the ceiling junction box.
6. Connect the black wire to the fire wire with a wire cap and the white wire to the zero wire with a wire cap and wrap tightly with insulating tape. Connect the fixture ground wire to the junction box ground wire.
7. Secure bulb to suspension plate with round head nut.
8. Remove the iron ring at the lamp head location, install the crystal glass shade to the lamp head location, and then secure the iron ring to the lamp head with the tool (provided).
9. Attach the bulb to the lamp head, ensuring good contact.

Attention:

1. The input power of the lamp is AC 120V 50Hz.
2. Any behavior that violates residential fire protection regulations is prohibited.
3. Under no circumstances should the lamps be covered with heat insulation pads or wooden materials.
4. Before maintenance, make sure that the power supply of the lamp has been cut off and the light source has cooled down. Before powering on, make sure that the light source and the lamp holder are connected correctly.
5. Please wipe with a towel or flannel, and clean the lamp body with a non-corrosive detergent. Do not scrub directly, wipe with water or a damp cloth.
6. If you have any questions about this manual, please consult a qualified lighting installation engineer.
