Notes

1. Please check the size of the product before ordering to make sure it fits your home. Please note that this product cannot be installed on sloping ceilings.
2. Please install the lamp in a dry environment. We recommend asking a certified electrician for installation. Please wear electrical insulated gloves (not included) during installation to avoid scratching the surface of the lamp and wires. Please make sure the power supply has been disconnected before installation, and perform a power-on test before installation.
3. For safe and reliable installation, please make sure that the electrical box where the luminaire is installed is properly connected to the structural members of the building. All wires are connected. When unpacking, be careful not to pull with the wires, as this may result in a poor connection. Please do not connect the power supply until the luminaire is fully assembled.
4. Please do not touch the bulb or look directly at the lit bulb when the fixture is turned on, and keep flammable materials away from the bulb.
5. Please use the fixture within the applicable voltage range and clean the fixture regularly. When cleaning the fixture or replacing the bulb, disconnect the power.
6. Please note that you need to prepare 6*E12 bulbs ($\leq 40W$) as well as a wall switch.
7. Please allow the slight color difference caused by the shooting light and 1-3cm error due to manual measurement, and make sure you do not mind before ordering.
