

Thank you for purchasing the bird cage. The following will be a detailed and photographed set of instructions of assembly for your convenience. Prepare to assemble your product in 4 easy steps.

### Step 1 – Check Materials

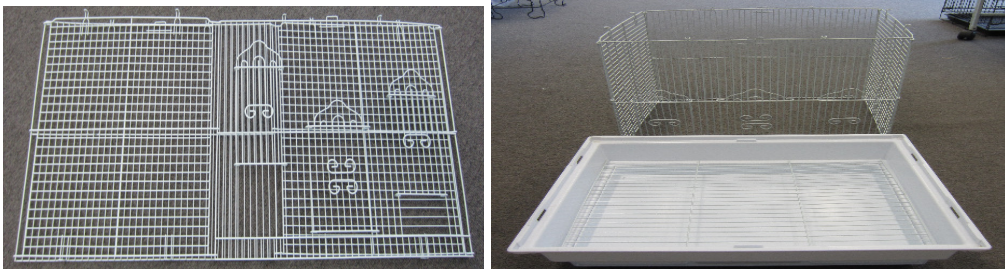

Please make sure you have the following:

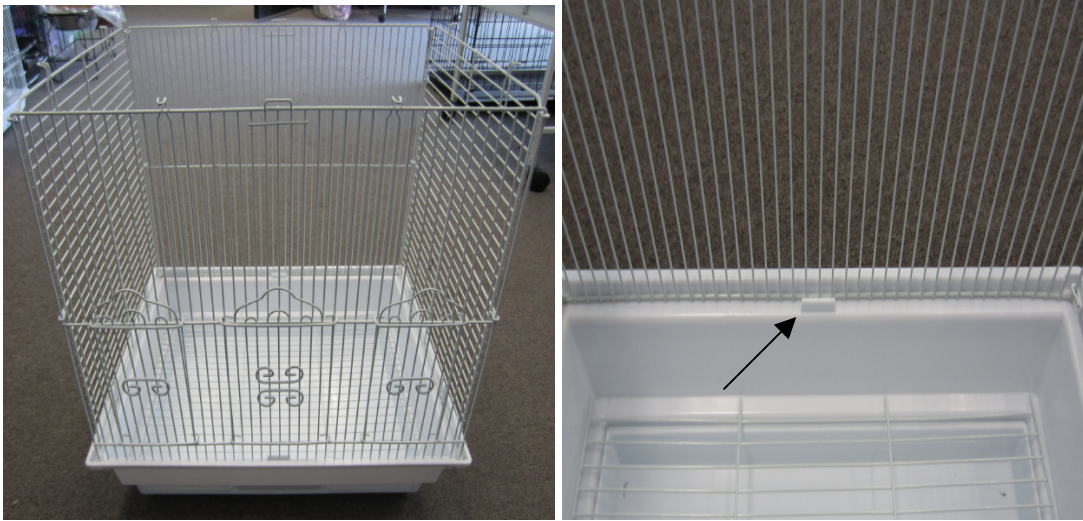

- Cage roof (2)
- Top frame (1)
- Bottom frame (1)
- Feeding cup (4)
- Wooden Perch (4)
- Base (1)
- Base sliding tray (1)
- Base grill

### Step 2 – Attach bottom frame to base

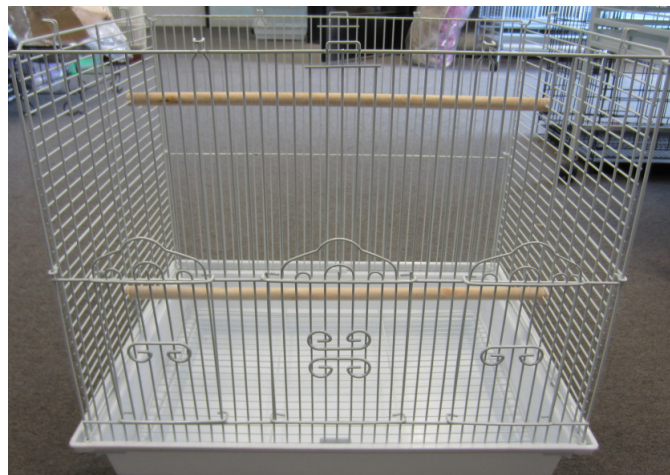

First, expand the bottom frame in to a square.

Next, simply attach the frame on to the base. Please make sure the frame is within the correct boundaries as marked by the arrows below.

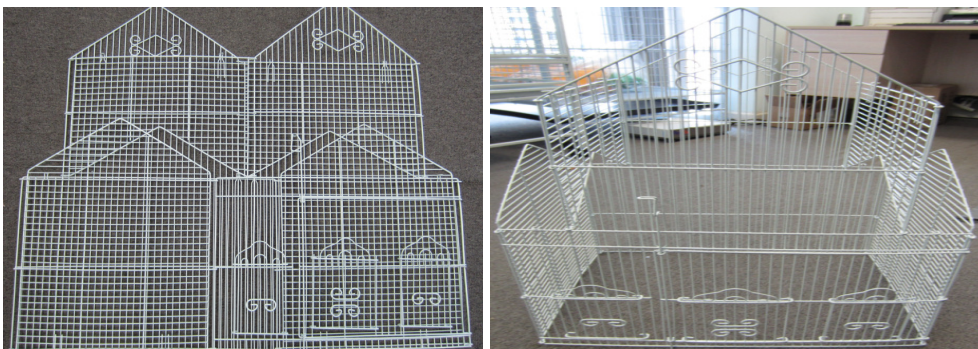

Now, proceed to attach the perches at your leisure.

### Step 3 – Attach top frame

First, expand the top cage frame.

Now, notice the hooks around the perimeter of the bottom frame. These hooks will be used to attach the bottom and top frames.

When the 2 frames are connected, check to see if all hooks are securely in place:

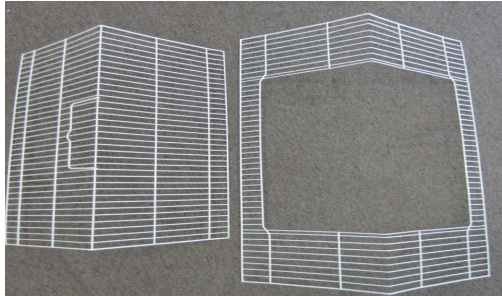

The cage should now look like this, proceed to attach the perches and cups at your leisure:

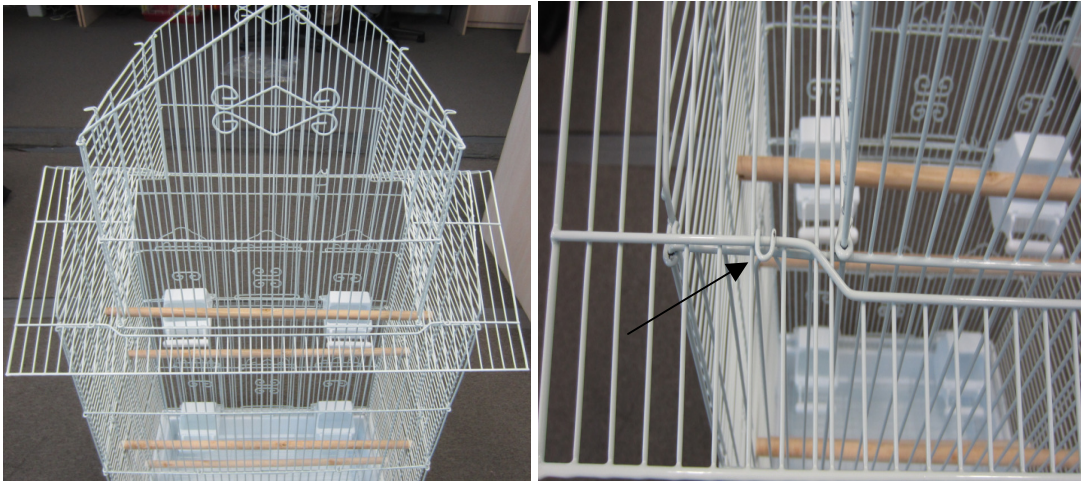

#### Step 4 – Attach the roofs

There are 2 sets of roofs. The one with the open space in the middle will go over the top of the cage.

With the first set of roofs attached, the cage should look like this (note: make sure hooks are securely in place at each side):

Lastly, the remaining roof will attach to the top by 4 hooks (see below):

Please make sure each side of the roof is securely attached:

Now, the cage is completed and should look like this:

Congratulations, you have successfully assembled your cage!
