

STEP 1

Check you have all parts needed for assembly against the instructions before you start.

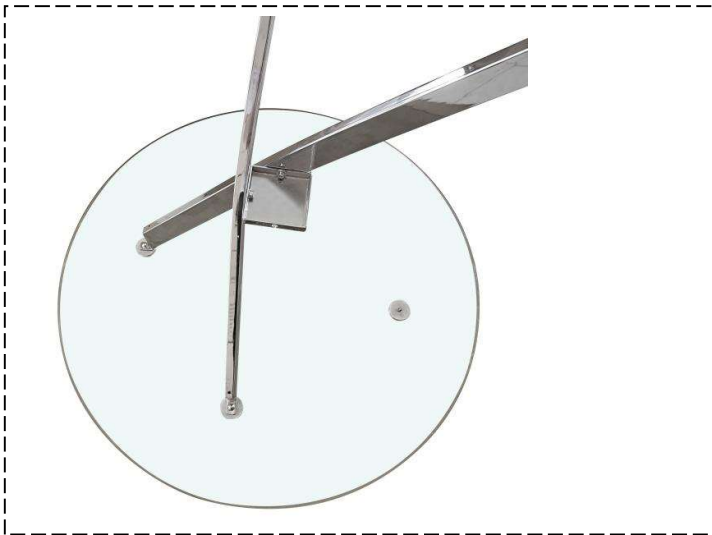

STEP 2

Screw the rods (Part A) into the tabletop.

STEP 3

Put two legs on top of the rods and use the M8 Nut (Part B) to secure the legs, but do not fully tighten yet as you need to be able to manoeuvre them.

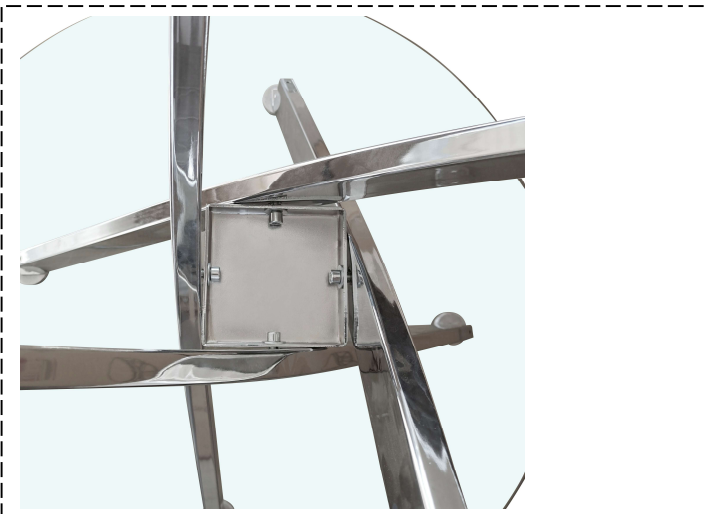

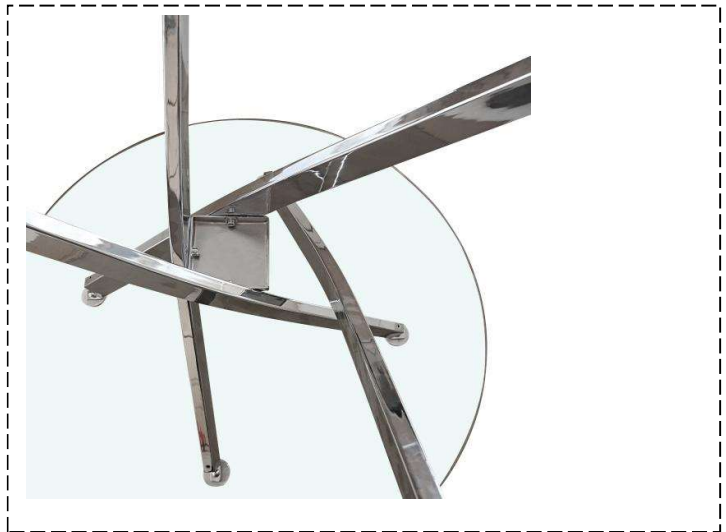

STEP 4

Connect the two legs together in the middle using the connecting piece (Part H) and the washers and screws (Part D and Part E).

STEP 5

Add the third and fourth leg and attach to the connecting piece.

STEP 6

How the legs should look once all attached.

STEP 7

Once the legs have all been connected, tighten all the nuts on the tabletop to make sure they are all secure.

STEP 8

Screw in the table feet on each leg.

STEP 9

Carefully lift the table over on to its legs and the table is ready to use.
