### Grounding Instructions

This product must be grounded. If it should malfunction or breakdown, grounding provides a path of least resistance for electric current to reduce the risk of electric shock. This product is equipped with a cord having an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances. This product is for use on a 120V circuit and has a grounding plug that looks like the plug in the following figure. Make sure that the product is connected to an outlet having the same configuration as the plug. No adapter should be used with this product.
