

Installation & Assembly

- 1 : Pass wire No. 2 through straight pipe No. 1.
- 2 : Connect the male and female plugs together.
- 3 : Insert the straight pipe with number 2 onto the top of the base with number 2.
- 4 : Before inserting the part of the 3rd light socket into the straight pipe numbered 1, first insert the wire into the pipe, then rotate it counterclockwise 4 times, and finally insert the part of the 3rd light socket into the straight pipe numbered 1.
- 5 : Turn the folding lampshade with number 6 upside down, so that the inside becomes the outside. Then, insert each round frame of number 5 one by one into the folding lampshade of number 6. Finally, turn the folding lampshade upside down again, and the inside becomes the outside once more.
- 6 : Insert item 5.6 (lampshade) into the lamp head (item 3).
- 7 : Tighten the lamp head ring of No. 7 lamp holder (that is, lock the lamp cover).
- 8 : Insert the E26 bulb into the lamp socket.
- 9 : Insert the plug into the power source, rotate the dimming switch, and the light will turn on.

STEP-BY-STEP LAMPSHADE ASSEMBLY GUIDE

1

Firstly, take the lampshade out of the package.

2

Secondly, turn the lampshade inside out.

3

Then pry open the hole on the lampshade and align it with the ring on the metal frame.

4

Then pass the holes on the lampshade through the solid metal lamp frame.

5

Thread all the holes on the lampshade through the metal frame one by one.

6

Flip the lampshade inside out again to finish.
