

How to Guide for Layering Valances

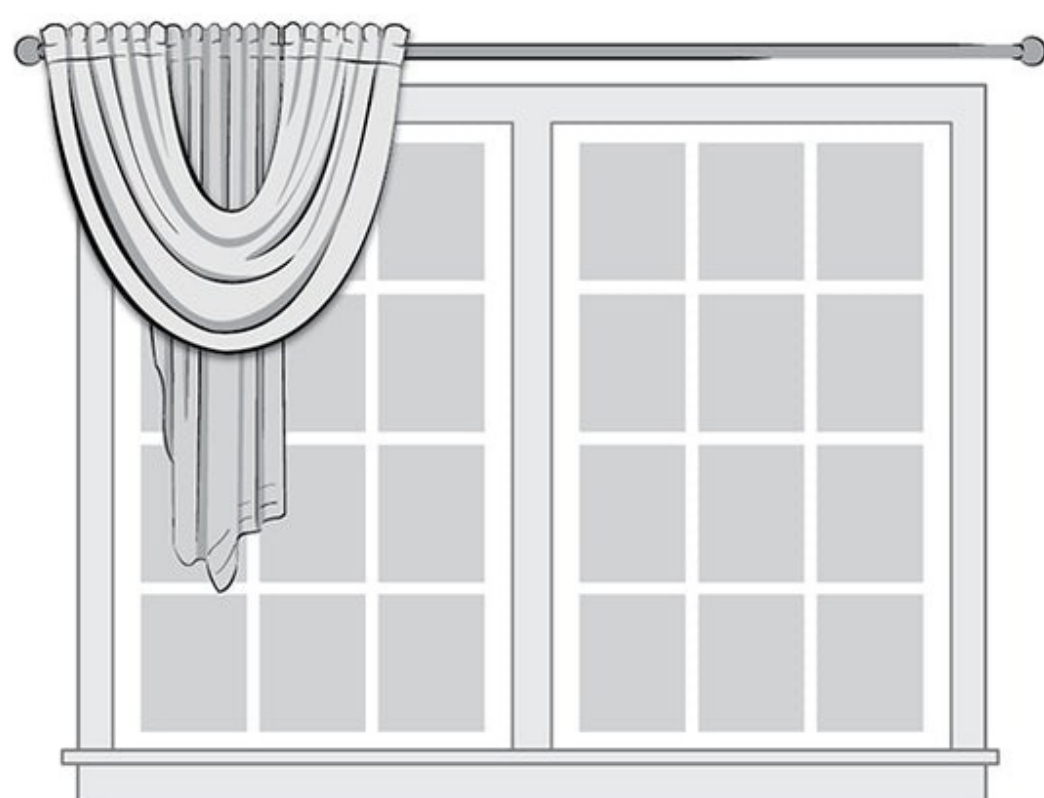

*You will need to purchase 2 individual rods or double rods for layering valances

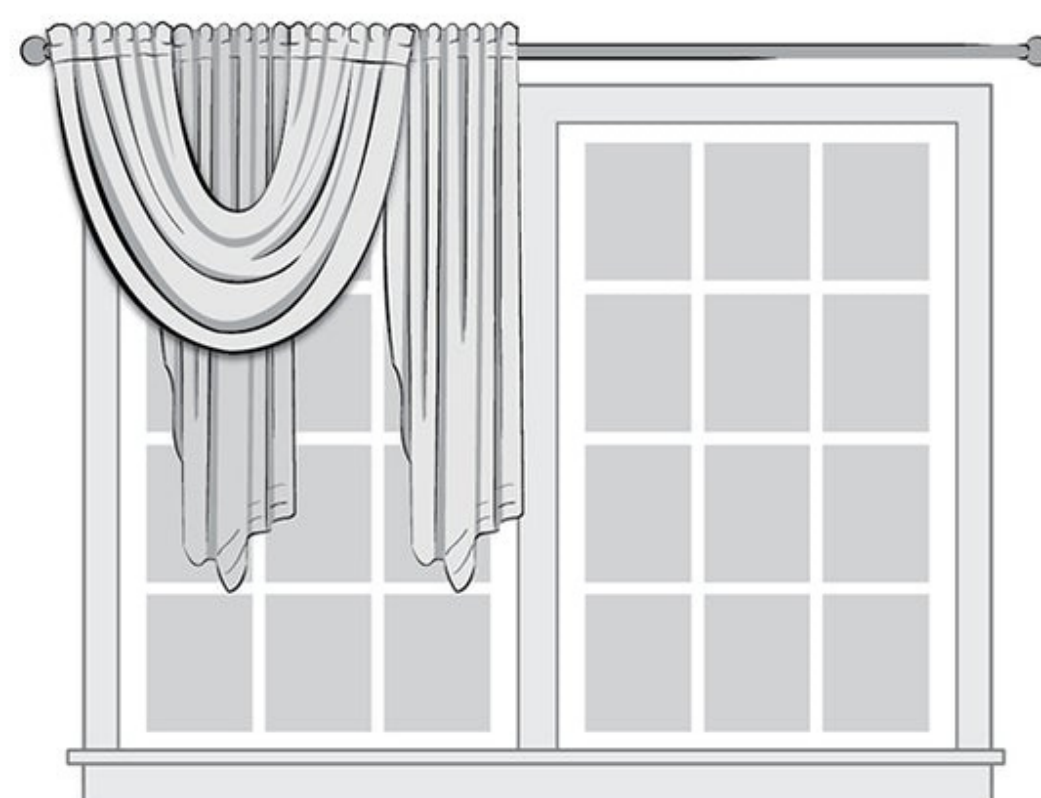

Step 1: Thread the first valance onto the left side of the rod

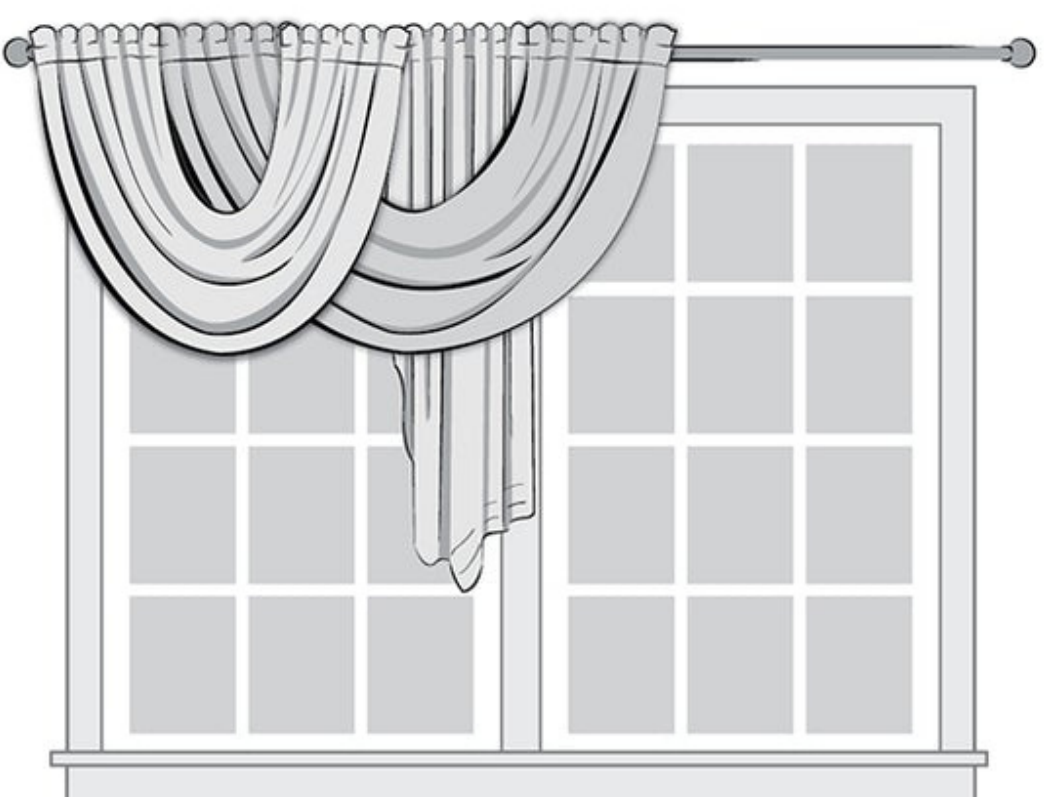

Step 2: Take the left side of your second valance and thread it through the rod as you did the first one

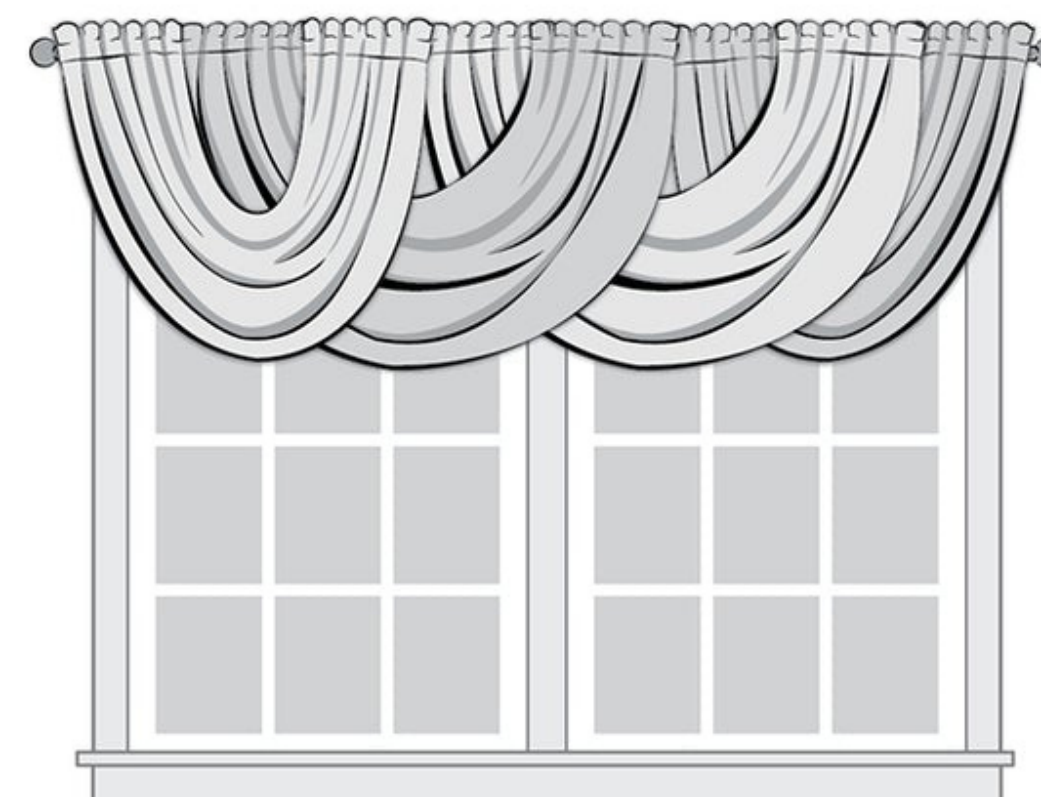

Step 3: Thread the right side of the first valance onto the rod

Step 4: Add the third valance onto the rod

Step 5: Thread the right side of the second valance onto the rod

Step 6: Continue this pattern until you achieve the look desired!
