

Assembly Schematic Diagram of 30cm Multipurpose Storage Cabinet

Installation Details

Top-level Compartment

Installation Instructions

1. Lay the middle frame flat on the ground and insert the upright posts on both sides;
2. The upper middle frame is aligned with the four holes of the lower column;
3. Align the upright post with the bayonet of the lower middle frame and shoot it into the bayonet of the lower upright post forcibly;
4. Repeat 2-3 steps according to the number of cabinet floors;
5. Install the top cover (align the four corner bayonets of the top cover with the lower column bayonet and shoot them in hard)
6. Install the pulley to the bottom floor (align the pulley with the four corner bayonets of the bottom floor and shoot it in) (installation is completed)

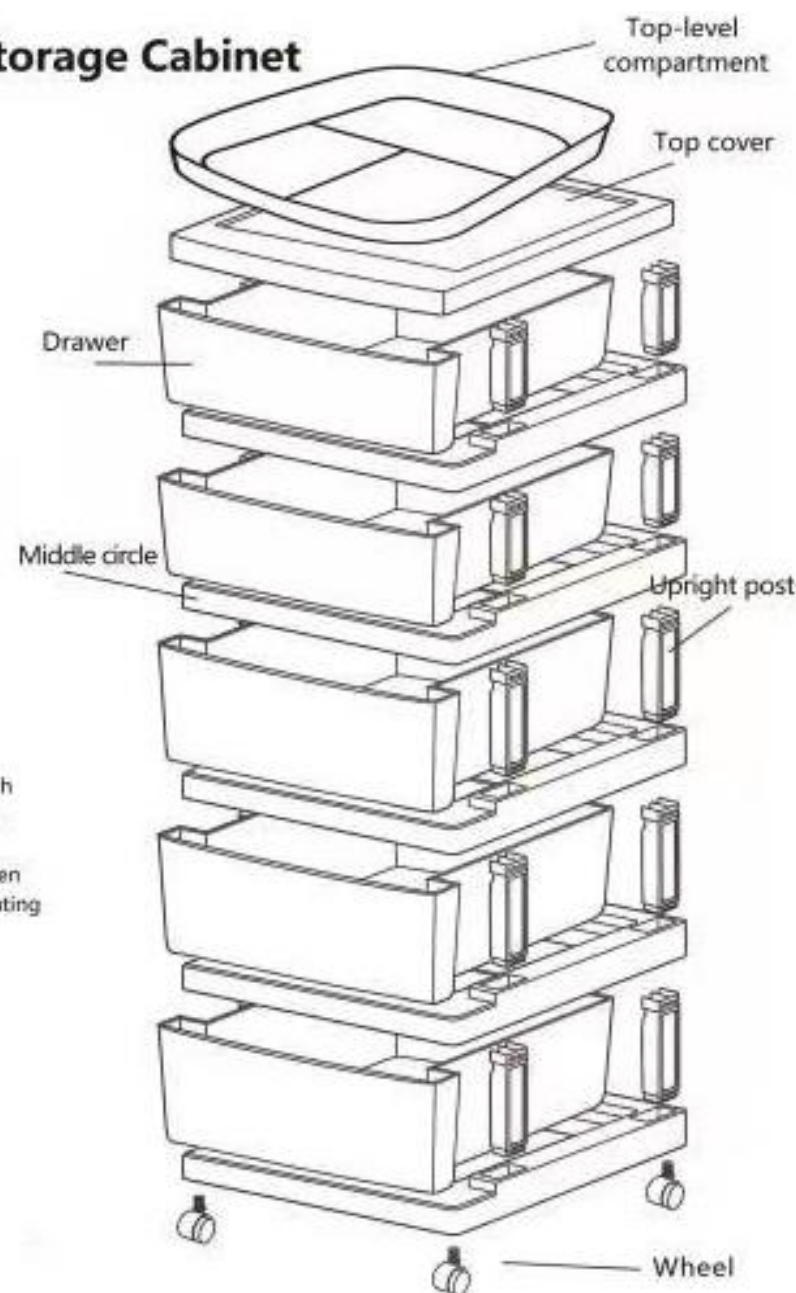

Attention

1. Please confirm whether the purchased model accessories are complete before assembly.
2. If it cannot be inserted during installation, you can try again with another part. Please do not knock hard to avoid damage to the product.
3. This product is made of PP raw material, which may deform when exposed to heat. Please do not use it in a high temperature heating environment.
