# Assembly Instructions

## STEP1 Main Structure

Assemble each 4 sets No.5+No.5 together, make them into one part first, use the shorter bolts, put the curve tube on the flat ground, make both tubes horizontal, then tighten the nuts. And assemble for 4 sets No.5+No.6 in the same way.

Assemble for 2 sets floor tubes No3+ No4 use the shorter bolts, and the horizontal frame No9+No8+No8+No8 together.

Assemble for 2 sets support diagonal tubes No7 + No7A use the shorter bolts.

STEP2

Loosely assemble complete frame, before tightening all bolts in final position.

STEP3

Loosely assemble complete frame, before tightening all bolts in final position.

# STEP4

Loosely assemble completed frame before tightening all bolts in final position.

## STEP5

For maximum stability of your polytunnel, we recommend digging a 20cm width trench around the base of the polytunnel and back.

Put the frame inside the trench, filling with the soil.

## STEP6

Tied the string in the back of the cover to the frame. Use the ropes and stakes for four corners of the greenhouse, to reinforce the stability of it.

### WARNING

Covering the roof carefully, puts all places in the right position. As much as possible as not make the frame structure of the greenhouse out of the shape.

Do not use it in bad weather conditions, such as a rainstorm, hailstone, heavy snow, and heavy wind.
