Executive Office Chair

About Us

How we started

The average person spends approximately nine hours per day sitting. Our target is to make these nine hours a nicer experience for everyone.

We endeavor to improve our products by adopting various technologies and materials, like ergonomics and carbon fiber. All steps targeted to support you comfortably when you're reading, playing and surfing the internet.

Multi-Layered Synthetic Leather

Our chairs are upholstered in a material that is not only comfortable, but also stronger and more durable than conventional PU leather, making it more suited to endure the peeling that occurs over time.

FACTORY DIRECT

The most significant dierence between our and other brands is that we are TRULY factory direct. When you go to a oce chair store, you'll see that they carry products from a variety of dierent brands. They must then mark up those products in order to profit when selling to you.

Ergonomically Designed

Every our chair is created in our own lab and testing facilities.

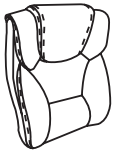

Every part of our chairs is designed, tested, and iterated to make them more comfortable and durable than ever before. Our engineers conduct significant research to learn how people interact with our chairs so that we can improve their ergonomic support.
