

Installation and Usage Notes

Installation shall be performed by **qualified electricians** only to avoid electric shock hazards. Please note the following:

- (1) Read the manual carefully before installation and keep it properly for future reference after use.
- (2) Ensure the lamp is installed securely and stably.
- (3) Wear gloves when installing or repairing the lamp.
- (4) All electrical connections must comply with the electrical safety regulations of the local area. Installation and maintenance must be conducted by professional personnel.
- (5) Do not install the lamp on lime-covered or damp ceilings.
- (6) Special note: Do not use the product in humid environments.
- (7) Strictly follow the specifications and types indicated on the product label when replacing the light source; otherwise, product damage or safety accidents may occur.
- (8) **Electrical Connection** :The main power supply must be equipped with a power switch. All wiring terminals must be firmly connected. The grounding terminal of the lamp must be reliably connected. Select an appropriate current-limiting switch in accordance with the lamp base sticker and this manual (to be performed by a professional technician).
- (9) **Light Source Replacement** :Turn off the switch, unplug the power plug, and wait for the light source to cool down. Remove the old light source, check the label, lamp base sticker and this manual. Install a new light source of the same type and suitable power.
- (10) **Cleaning** :Turn off the switch and cut off the power supply. Wipe the lampshade dry with a clean dry cloth; do not reinstall it on the lamp body until the lampshade is completely dry. Do not use corrosive liquids to clean any part of the lamp. Do not allow water to splash into the lamp head or lamp body. Wipe the lamp body with a clean soft cloth. Do not immerse the lamp in liquid.

Direct ceiling mounting method
