

OPERATIONS MANUAL

**Warning:** If any special control devices are used with this fixture, follow the instructions carefully to assure full compliance with N.E.C.requirements. If there are any questions, contact a qualified electric contractor.

**Caution:** It is highly recommended to get an electrician to install this light. Please make sure to turn the electricity off at the main circuit breaker before beginning installation. All glass is fragile. Use care when handling glass component(s) and/or lamp(s).

1A. Lock the crossbar to the junction box of the ceiling by using 2 pcs of 5/32 screws in the accessories bag.

1B. Connect the wires. The hot/positive wire (+) has an "L" label on it. The other one is the negative wire (-). And the bare cooper is the ground wire.

1C. Attach the canopy to the ceiling with screws

Wires meeting safety standards are required to connect the electrical circuit.

The diagram illustrates a two-core cable with a shield. On the left, the internal conductors are labeled 'L' (Line) and 'N' (Neutral). The right side shows the shielded section, which includes a braided shield and an outer jacket.

Please read all instructions carefully. Before you proceed to install, make sure that the power supply is turned off and remains off until installation is completed.
