

Installation & Assembly

2 people for assembly

Components - Fittings

Please check you have all the panels listed below

Note: The quantities below are the correct amount to complete the assembly. In some cases more fittings may be supplied than are required.

[illegible]

PRODUCT ASSEMBLY

Step 1

E		12 PCS
CL		2 PC
CR		2 PC

Note that the first hole of the slide rail and the leading hole of the board shall be positioned during the installation of the slide rail!

x2

Step 2

E		6 PCS
CL		1 PC
CR		1 PC

Note that the first hole of the slide rail and the leading hole of the board shall be positioned during the installation of the slide rail!

PRODUCT ASSEMBLY

Step 3

A		20 PCS
---	---	--------

Step 4

D		4 PCS
---	---	-------

PRODUCT ASSEMBLY

Step 5

D		2 PCS
---	---	-------

Step 6

A		4 PCS
---	---	-------

PRODUCT ASSEMBLY

Step 7

C		6 PCS
B		4 PCS

Step 8

C		4 PCS
B		10 PCS

PRODUCT ASSEMBLY

Step 9

C		4 PCS
B		10 PCS

Step 10

A		11 PCS
---	---	--------

PRODUCT ASSEMBLY

Step 11

C		10 PCS
B		11 PCS

Step 12

G		2 SETS
---	---	--------

PRODUCT ASSEMBLY

Step 13

G		2 SETS
---	---	--------

Step 14

A		12 PCS
F		3 PCS

PRODUCT ASSEMBLY

Step 15

D		12 PCS
---	---	--------

Step 16

PRODUCT ASSEMBLY

Step 17

B		12 PCS
---	---	--------

Step 18

E		12 PCS
DL		3 PCS
DR		3 PCS

PRODUCT ASSEMBLY

Step 19

Step 20

A Guide to Wall Mounting & Fixings

Important note:

If plastic wall plugs (rawl plugs) are supplied with your product, eg:

- these are suitable for use in masonry walls

If you are in any doubt about the correct wall plugs for your wall, seek professional advice.

Failure of the product due to using the incorrect fixings is the responsibility of the installer.

Important: when drilling into walls always check that there are no hidden wires or pipes etc.

Make sure that the screws and wall plugs being used are suitable for supporting your unit. Consult a qualified tradesperson if you are unsure.

Hints:

1. General rule: always use a larger screw and wall plug if you are not sure.
2. Ensure you use the recommended drill bit to match the wall plug and hole size.
3. Ensure you drill the hole horizontally; do not force the drill or enlarge the hole.
4. Take extra care when drilling high walls, ceilings and ceramic tiles. Ensure wall plugs are inserted beyond the thickness of the ceramic tiles to avoid the tiles splitting or cracking.
5. Ensure wall plugs are well fitted and are a tight fit in the drilled hole.

Types of walls

You can use one of the following types of wall plug if your walls are made of brick, breeze block, concrete, stone or wood.

No. 1 "General Purpose" wall plug

Generally aerated blocks should not be used to support heavy loads, use a specialist fitting in this case. For light loads, general purpose wall plugs can be used.

No. 3 "Cavity Fixing" wall plug

For use with plasterboard partitions or hollow wooden doors.

No. 5 "Hammer Fixing" wall plug

For use with walls stuck with plasterboard. The hammer fixing allows it to be fixed to the wall rather than the plasterboard. Always check the fixing is secure to the retaining wall.

No. 2 "Plasterboard" wall plug

For use when attaching light loads onto plasterboard partitions.

No. 4 "Cavity Fixing - Heavy Duty" wall plug

For use when fitting or supporting heavy loads such as shelving, wall cabinets and coat racks.

No. 6 "Shield Anchor" wall plug - heavy loads

For use with heavier loads such as TV and HiFi speakers and satellite dishes etc.

Care & Maintenance

Safety: Always check the fitting and location to ensure your safety in and around the home.

Fitting: From time to time check the fitting to ensure the wall plugs or screws do not become loose.
