			X8
Step1:Check if the accessories are complete			
Firstly, remove the screws from the pipe fittings and install them according to the reference steps			
When installing the product, first fix the screws on the bracket, wait for them to be fully installed, and then lock all screws			

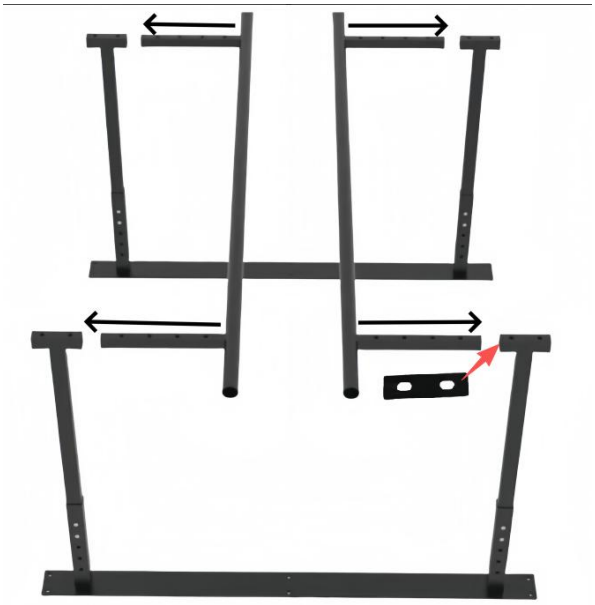

Step2:Connect L-shaped fittings together with short pipes，And tighten the screw (Install one side first, then install the other side)

Step3:Step3:Install 4 long pipes on the base,And lock the screw
Insert the iron sheet. One piece on each side of the rectangular tube, the rest are the same for BCA.

Step4:Step4:Install the long pipe onto the bracket and secure it with screws
Insert the iron plates. Each plate is located on one side of the rectangular tube, with the rest being identical for BCD purposes.

Step5:Installation completed
